CLLD Factsheet 2021-2027: **ESTONIA**

EUROPEAN MARITIME, FISHERIES AND AQUACULTURE FUND (EMFAF)

Community-led Local Development (CLLD) under the EMFAF in Estonia focuses on supporting the development of coastal, island and inland communities; increasing the value of local fisheries products; improving the infrastructure of small ports; mobilising resources for the blue economy and coastal tourism; supporting fishers in diversifying their activities and creating or restoring spawning grounds. During the 2014- 2020 programming period, Estonia had eight fisheries LAGs, which attracted a high level of interest from local stakeholders and local small-scale fishers. Specifically, CLLD under the EMFAF aims to improve the competitiveness of the sector, increase fishers' incomes and their resilience to potential economic and environmental crises and support the deployment of renewable energy solutions.

CLLD budget in Estonia (EMFAF)

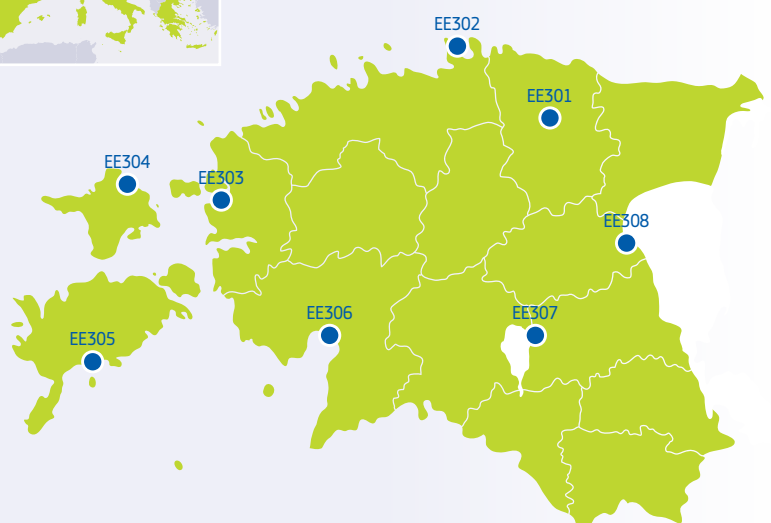

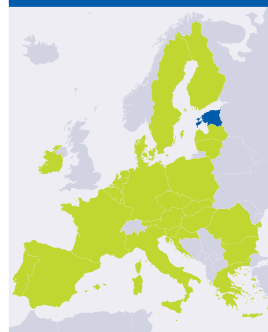

EMFAF funding € 21 576 450

Co-financing € 9 801 873

Total € 31 378 323

Average FLAG budget €3 922 290

Fisheries LAGs in Estonia
