TWINNED
By Stars

Unlocking the potential of innovation, circularity, and digitalisation for accelerating new marine-based ecotourism, joint practices, and businesses in ORs.

TWINNEDbySTARS is a European project co-funded by the EMFAF programme aimed at increasing the competitiveness of maritime tourism in the Outermost Regions (ORs) while contributing to preserving biodiversity and cultural heritage. The project acts in three areas: strengthening partnerships already in operation, capacity building, and co-creation opportunities for the design and implementation of astro-tourism and eco-tourism experiences across four Atlantic Outermost Regions, from the Canaries to Martinique and returning westwards via the Azores and Madeira.
