1 Introduction

1.1 Background

In accordance with Regulation (EU) No 508/2014 of the European Parliament and of the Council of 15 May 2014 on the European Maritime and Fisheries Fund (EMFF Regulation), a common monitoring and evaluation system (CMES) for the operations co-financed by the EMFF under shared management was required to be established with the intention of measuring the performance and the achievements of the EMFF.

DG MARE assessed the implementation of the CMES and reported to the Council and the Parliament according to EMFF regulation 508/2014, Article 107(4). The so-called FAME CMES report appeared in September 2017 and summarised lessons learnt. A revised report is due in 2021.

The Common Provisions Regulation (CPR) and the EMFAF Regulation for 2021-2027 entered into force in July 2021. They contain provisions related to the monitoring and evaluation framework (MEF) and are complemented by the Implementing Regulation 2022/79 pursuant to EMFAF regulation, Article 46.

DG MARE and FAME SU developed a concept for the MEF 2021-2027 based on the lessons learnt from the current CMES since 2015 and the aforementioned report from 2017. This concept was presented to the Member States (MS) and discussed with the EMFF Managing Authorities (MAs) during the FAME Annual Stakeholder Meeting (ASM) in September 2018. Updates were provided in the form of MEF fiches in the course of EMFF expert group meetings in 2019. This process culminates in the present FAMENET working paper.

1.2 Purpose and target group

The objectives of the working paper on the MEF 2021-2027 are to:

- build on the lessons learnt from the CMES 2014-2020;
- create a common reference document for all MEF 2021-2027 elements (e.g. common result indicators, Infosys¹, etc.);
- provide a basis for the drafting of EMFAF implementing acts in relation to the monitoring, evaluation and reporting provisions of the CPR and the EMFAF regulation.
- assist MAs to prepare their EMFAF programmes for 2021-2027.

The target groups are DG MARE and MA officers, evaluators and other interested experts.

1.3 Structure of the document

After this introductory chapter, the working paper is divided into three main chapters. Chapter 2 provides a background and overview of the MEF 2021-2027, including the legal and regulatory basis for the MEF, its overall purpose, an outline of its main elements, and the key deliverables and timeframe for its fulfilment. Chapter 3 describes in full detail all of the main

¹ Monitoring system under EMFF and EMFAF.

elements of the MEF. Chapter 4 includes annexes of the most up-to-date lists of all the concrete items, which form the basis of these MEF elements and are required knowledge for programme preparation.

1.4 Acknowledgments

FAMENET would like to thank all DG MARE officers and Member States' Managing Authorities experts and officials for their active contribution to this paper through a long series of meetings and workshops since 2018.

In particular, we acknowledge the hard work and dedication of Gabriela IGLOI, Vincent GUERRE, and Eoin MAC-AOIDH from DG MARE Unit D3 in the completion of this paper. Without their continued support and guidance, this working paper would not have been possible, and for that FAMENET is extremely grateful.

Note: The approach and methodologies proposed in this working paper do not constitute legal interpretation and are not binding. They are considered recommendations by technical experts to enhance exchange among stakeholders and to enrich the body of knowledge on EMFAF implementation.

2 MEF 2021-2027

2.1 Legal basis

The MEF 2021-2027 described herein is based primarily on three documents; the present paper combines them in a coherent structure:

- the CPR 2021-2027²,
- the EMFAF 2021-2027 regulation³, and
- the Commission Implementing Regulation⁴.

The fundamental principles of the MEF 2021-2027 are outlined in the CPR. It includes, in particular, a performance framework, the reporting on cumulative data on operations and a system of types of intervention. This framework common to all the funds is complemented with EMFAF-specific elements, i.e. reporting of operation-level data, specific EMFAF indicators and specific EMFAF types of intervention defined in the EMFAF regulation.

2.2 Purpose of MEF

The purpose of the MEF is to provide a standardised, structured system for the accurate, comparable, and systematic monitoring and evaluation of the efficiency, effectiveness and impact of EMFAF programmes. This requires a clearly defined system of data collection and reporting, and continued cooperation between COM and other relevant stakeholders.

An effective **monitoring and evaluation** system is necessary to assess to what extent MS' programmes achieve their desired objectives, and to provide insight into what can be improved in the future.

Box 1: Monitoring and evaluation

Monitoring and evaluation can be defined as two separate but closely related activities.

Monitoring is defined as "a continuing function that uses systematic collection of data on specified indicators to provide management and the main stakeholders of an ongoing intervention with indications of the extent of progress and achievement of objectives and progress in the use of allocated funds."

Evaluation is defined as "the systematic and objective assessment of an ongoing or completed project, programme, or policy, its design, implementation and results."

2.3 MEF elements and their position in the EMFAF framework

The MEF 2021-2027 consists of a number of key elements. The table below gives an overview of these elements, their source and date of appearance in the legislative framework, with short comments for contextualisation. They are discussed in detail in Chapter 3.

#### 2.4 Intervention logic

A key element of the MEF is a clear intervention logic, which outlines the reasoning behind EMFAF funding into MS fisheries, aquaculture and maritime activities. The intervention logic will describe the needs of the MS in question, as well as how and why the EMFAF will be used to address these needs. We distinguish between three levels of the intervention logic: the policy level, the programme level as well as the operation level. For the programme all three levels need to be taken into account. For the programme level the following principles are relevant:

- The EMFAF is structured along four priorities;
- Each priority is broken down in specific objectives (see Annex section 3.1);
- For each specific objective:
  - o types of actions will be defined
  - o main target groups will be defined
  - o types of interventions will be selected
  - o target values and milestones for output indicators will be set
  - o a minimum of one common result indicator will be selected, and target values will be set.

These three levels and the components of the intervention logic are illustrated in the figure 1 below and described in details in the following sections. See also figure 3 on page 10.

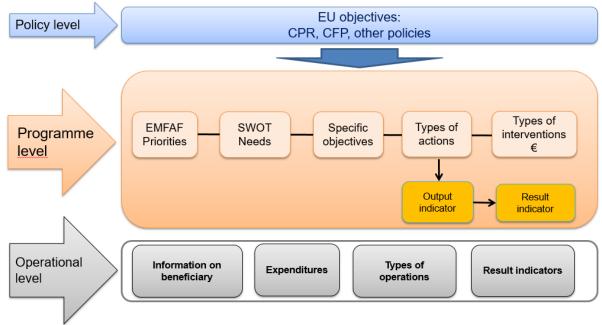

Figure 1: EMFAF 2021-2027, intervention logic

Source: FAME 2021, based on the Better Regulation Toolbox #46

#### 2.5 Policy objectives

The policy objectives are a guiding part of the intervention logic and belong to the upper policy level. According to Article 5 of the CPR, the EMFAF shall support the following overarching policy objectives of the European Union:

- a) a more competitive and smarter Europe by promoting innovative and smart economic transformation and regional ICT connectivity;
- b) a greener, low-carbon transitioning towards a net zero carbon economy and resilient Europe by promoting clean and fair energy transition, green and blue investment, the circular economy, climate change mitigation and adaptation, risk prevention and management, and sustainable urban mobility;
- c) a more connected Europe by enhancing mobility;
- d) a more social and inclusive Europe implementing the European Pillar of Social Rights;
- e) a Europe closer to citizens by fostering the sustainable and integrated development of all types of territories and local initiatives.

EMFAF priorities (see below) link to two of these policy objectives: EMFAF priorities 1, 2, 4 link to policy objective (b), and EMFAF priority 3 links to policy objective (e).

The policy objectives from the Common Fisheries Policy⁵ should also be taken into consideration at the policy level of the intervention logic because the EMFAF aims "to

_

⁵ See Article 2 of Regulation 1380/2013

channel funding from the Union budget to support the Common Fisheries Policy", as mentioned in the recitals of the EMFAF Regulation.

#### 2.6 EMFAF priorities

The EMFAF priorities are a guiding part of the intervention logic and pertain to the programme level. The priorities are broad thematic or sectoral categories. There are four priorities:

- 1. Fostering sustainable fisheries and the restoration and conservation of aquatic biological resources;
- 2. Fostering sustainable aquaculture activities, and processing and marketing of fishery and aquaculture products, thus contributing to food security in the union;
- 3. Enabling a sustainable blue economy in coastal, island and inland areas, and fostering the development of fishing and aquaculture communities
- 4. Strengthening international ocean governance and enabling seas and oceans to be safe, secure, clean and sustainably managed.

#### **Box 2: Priorities selection and SWOT**

Based on a SWOT analysis (see below), MS select the priorities they wish to support in their EMFAF programme. MS should also perform a SWOT analysis for priorities not selected for their programme, to rationalize why these priorities have not been selected.

Different cases apply for not selecting a priority:

Case a) The Partnership Agreement mentions that this Priority will not be used: MS needs to provide a short explanation in the justification section. It is assumed for example that landlocked countries will be mentioning in their Partnership Agreements that Priority 4 will not be used.

Case b) There is no need: MS needs to provide a SWOT leading to the conclusion The absence of need must be the conclusion of the SWOT, thus there should be a full SWOT.

Case c) There is a need but it is addressed in another priority/with other instrument: MS needs to provide an explanation provide an explanation in the justification section why they are not addressed in this priority but elsewhere. No full SWOT needed.

Case d) There is a need but it is not addressed to concentrate resources on more important needs in other priorities: MS needs to provide an explanation why they are not adressed. No full SWOT needed.

#### Source: FAME, 2021

#### **2.7 SWOT**

A SWOT analysis is a strategic comprehensive planning technique used to identify strengths, weaknesses, opportunities, and threats related to a region or a sector⁶.

⁶ Further details and methodology for the completion of the SWOT section of the EMFAF programme can be found in the FAME working paper on the EMFAF programme template, Ch. 4.1.

The **SWOT** analysis is included in Table 1A of the EMFAF programme. The SWOT is performed separately for each EMFAF priority. It is an important part of the intervention logic and pertain to the programme level, where it serves as a starting point to identify the overall **needs** to be addressed by the MS, and the subsequent actions to be undertaken using EMFAF support:

- **Strengths** are *positive* characteristics inherent to the region or the sector, which can be beneficial to them as a whole.
- **Weaknesses** are *negative* characteristics inherent to the region or the sector, which could be detrimental to them as a whole.
- **Opportunities** are *positive elements outside the control of the region or sector*, which nevertheless affect them and can be utilised to generate positive outcomes.
- **Threats** are *negative elements outside the control of the region or sector*, which could be detrimental to them.

The SWOT analysis helps determine the needs of the sector and helps to select priorities and specific objectives, and should explain why certain priorities have not been selected, if that is the case.

Types of actions Needs Strengths: Strong tradition in fishing Flexibility of SSCF Need for is it necessary to Diversification economic choose the SO to of small-scale Opportunities: recovery of address the need fishing fleets Demand for local local fishers are the sustainable tourism regional/national Increase in demand you need to for local fish. follow does the Weakness¹ say Old fleet does the Poor economic state say Need to İS in this Cessation reduce the programme and how fleet does it add up to the Threats: current 2014-2020 High competition from programme Asia

Figure 2: Example of how to combine the SWOT elements to define needs and types of actions

Source: FAME 2021

#### 2.8 Needs

The needs of a MS are determined on the basis of the SWOT analysis and pertain to the programme level of the intervention logic. They are general descriptions of what the MS needs

to do and what support the MS need in the coming programming period to improve its fisheries and aquaculture sector⁷. Examples of needs include:

- "Need for economic recovery of local fishers";
- "Need to reduce the fleet":
- "Need for the development of knowledge exchange and availability of skilled labour".

Needs are a pivotal part in the intervention logic, because proposed actions are meant to respond to those needs.

MS need to provide a **justification of action** explaining why they will target support to the needs identified, showing a clear link between the SWOT and the identified needs. The justification of action follows a clear path from the SWOT and needs analysis, to the programme strategy and the selection of SOs, and finally to the types of actions.

#### 2.9 EMFAF specific objectives

Specific objectives pertain to the programme level of the intervention logic and result from breaking down the priorities into smaller, more focused segments. Specific objectives are set in the EMFAF regulation. Priority 1 has six specific objectives, priority 2 has two, and priorities 3 and 4 have only one specific objective each.

MS select specific objectives based on the SWOT and needs analysis. For each selected specific objective, MS will define or select:

- types of actions (narrative of intervention);
- common result indicators (based on a predefined set) and their respective baselines and targets;
- types of interventions (based on a predefined set) and indicative allocation of funds thereto:
- financial allocation and EU co-financing rate.

A full list of the EMFAF specific objectives is provided in Annex 3.1.

#### 2.10 Types of actions

Types of actions are new to the CPR 2021-2027. These are broadly-defined planned actions to address the needs defined through the SWOT. Types of actions are not selected from a predefined list⁸. MS need to define types of actions according to their needs, separately for each specific objective, following the logic of the programme.

The types of actions must be consistent with the selected types of interventions and common result indicators and coherent with the SWOT elements and needs. They pertain to the programme level of the intervention logic and will guide the operational level of the intervention logic.

The figure below illustrates these steps of the intervention logic via a detailed overview.

⁷ Further details and methodology on the completion of the "needs" and "justification of action" portions of the EMFAF programme can be found in the FAME working paper on the EMFAF programme template. Ch. 4.1

programme can be found in the FAME working paper on the EMFAF programme template, Ch. 4.1.

§ Additionally, actions listed in the "Commission Staff Working Document (SWD) setting out a regional sea basin perspective to guide the EMFF programming" can act as source of inspiration.

Improve the economic sustainability of the Strengthen the stock of European Needs aquaculture sector and increase production eel in inland watercourses capacity Specific objective: Contributing Specific objective: Promoting sustainable to the protection and restoration aquaculture activities, especially of aquatic biodiversity and strengthening the competitiveness of Objectives ecosystems aquaculture production, while ensuring that the activities are environmentally sustainable in the long term Financial, human, institutional resources and knowledge allocated in Member State and EU Modernise, improve and expand Restocking of the European Eel sustainable aquaculture Output Number of operations CR01 New CR10 Actions CR04 Businesses Result CR07 Jobs with higher production contributing to good maintained environmental status. turnover capacity Increase the number of European eel Increase production capacity and turnover Impact in inland watercourses and contribute and improve the aquaculture sector to an improvement of the stock

Figure 3: Detailed intervention logic, examples

Source: FAME 2021, based on the Better Regulation Toolbox #46

#### 2.11 Types of interventions

Types of interventions are predefined thematic categories related to policy issues (for example combating climate change) and pertain to the programme level of the intervention logic. They are used to indicatively allocate funds along those policy issues at the programming stage. They are the main thematic blocks MS could use when communicating about the funds on their websites. They are also used to monitor climate and environment expenditure and for reporting on funding allocated. Each type of intervention has predefined climate and environment coefficients, which the Commission will apply to the amounts reported by the MS to track climate change and environmental expenditure.

The EMFAF includes 16 types of interventions, of which three are CLLD-specific and one is TA-specific. They are listed in Annex IV of the EMFAF Regulation.

During programming MS select under each specific objective the most appropriate types of interventions in accordance with the defined types of actions, and indicatively allocate funds to each of them. This indicative allocation must match the financial plan of the programme.

MS can freely choose as many types of interventions per specific objective as they see fit; no formal restriction applies. MS however must choose at least one type of intervention per specific objective in their programme.

During the programme implementation, the MA must choose the most appropriate type of intervention for each selected operation (see also chapter 0). Every operation must be linked to only one type of intervention most suitable for the operation. This is necessary for reporting of aggregated data for each operation under CPR Article 42. MAs however can select a type of intervention not selected in the programming phase.

A full list of the EMFAF types of interventions is provided in the Annex (see chapter 3.2)

#### 2.12 Set of common indicators

A crucial component of an effective monitoring and evaluation system is a set of indicators that can be used to monitor results and outputs and evaluate the efficiency, effectiveness and impact of interventions. They pertain to the programme level of the intervention logic and are also part of the operational level of the intervention logic.

MEF 2021-2027 has three types of **common indicators: output indicators, result** and **core performance indicators.** 

#### 2.12.1 Common output indicators

Output indicators aim to measure output produced with EMFAF support. The EMFAF has only one type of output indicator: "number of operations".

MS define the target value for the number of operations for each specific objective in the EMFAF programme. That is the sum of all operations to be implemented for that specific objective.

EMFAF output indicators demonstrate their full explanatory potential in combination with Infosys (see chapter 2.14).

#### 2.12.2 Common result indicators

Common result indicators are a predefined set of indicators, along specific thematic categories, included in Annex I of the EMFAF regulation. They aim to demonstrate the gross effect of the EMFAF programme, and are common to all MS.

It is assumed that the set of common result indicators covers the entire scope of what the MS might fund under the EMFAF. So-called "programme-specific" result indicators defined by the MS themselves are in principle possible, and MS may use them, but they should not include them in their programme nor report on them to the COM.

A full list of common result indicators is provided in Annex 3.3.

They are used in **three phases**, during:

- programming
- implementation
- evaluation

#### Common result indicators during programming

Common result indicators and their targets are not an administrative detail of the programme but crucial political messages about what the programme wants to achieve with the funds allocated to it. MS select under each specific objective the most appropriate common result indicator(s) to reflect their strategy and the outcome expected. There can be no specific objective in a programme without at least one common result indicator, but MS are invited to select as many as necessary to cover the most important effects of the fund. At the same time, MS should avoid selecting only indicators that measure marginal effects.

Therefore, the guiding principle is: "As many indicators as necessary to cover the most important effects of the fund. Selected common result indicators need not cover every possible aspect of the envisaged actions, but cover the most important effects.

MS define the **baseline and the target value** for each selected common result indicator for all specific objectives in the EMFAF programme. The baseline is the value of the indicator at the "starting point", for example, 2021. The specific period in which the baseline is measured depends on the timing of approval of the MS' programme. The target is the sum of the effects of all operations to be implemented up to the end of the period. Target values only refer to results achieved by EMFAF operations.

All common result indicators have a baseline of zero in the programme; the only exception is CR12 "Effectiveness of the system for "collection, management and use of data".

#### **Example:**

A certain MA determines that the programme should address their country's SSCF, which is in decline. As part of their programming strategy, the MA decides to allocate EMFAF funds towards actions relating to SSCF under specific objective 1.1. "Strengthening economically, socially and environmentally sustainable fishing activities".

The total effects of these actions would ultimately be seen in terms of securing employment, turnover increased, and skills enhancement. Relevant indicators are "jobs maintained", "businesses with higher turnover" and "persons benefitting". However, the political focus and the majority of the funds are linked to employment and economic viability. Thus, the MA decides that the most important indicators to use in the programme and to set targets for are "jobs maintained" and "businesses with higher turnover".

#### Common result indicators during implementation

MAs report in Infosys, for each selected operation, any common result indicator(s), which succinctly capture the intended effects of the operation. Only the common result indicator(s) relevant to the specific operation shall be reported. It is not required to include empty lines for the other non-relevant common result indicators under the specific objective from the EMFAF

programme or to report these indicators with zero values in all Infosys fields (3.3.2). MAs are encouraged to select as many result indicators as needed per operation, to ensure that the effects of the operation are adequately captured by the selected indicators.

The rule is: "No operation without at least one common result indicator; should the common result indicators selected in the programme not be applicable, the operation should use another common result indicator".

When the operation is selected, the MS (MA, IB or beneficiary, as per the discretion of the MS) will decide which common result indicator(s) will be chosen for the operation.

Then, during implementation, the beneficiary will report three values for each relevant common result indicator:

- a baseline value indicating the situation before the operation (in most cases zero);
- an ex-ante target value, which is the situation expected to be reached because of the operation;
- an ex-post target value, which is the situation actually reached after the operation and because of the operation.

#### **Example:**

The MA of the example above selects two operations under specific objective 1.1., a diversification operation and a training operation.

The beneficiary of the diversification operation invests to enable them to take tourists on board their vessel. The jobs of the family members are secured and their turnover rises. The programme indicators "jobs maintained" and "businesses with higher turnover" are both suitable, since they measure the primary effects of the operation.

The beneficiary of the training operation, a vocational training institute, trains young fishers in marketing techniques. In this case, the employment and turnover of the beneficiary are irrelevant to the EMFAF, so "jobs maintained" and "businesses with higher turnover" are not applicable at the operation level. Instead, the beneficiary (i.e. the vocational training institute) selects "persons benefitting" as a more suitable indicator for this operation.

In the case that MS desire to make an amendment to their programme, including the *modification* of indicators (for example target values), they may submit a motivated request for an amendment to the COM as per the requirements set out in Article 24 of the CPR. However, amendments relating to the *introduction* of additional indicators for programmes supported by the EMFAF do not require the approval of the commission, as per Article 24(7) of the CPR.

Amendments to programmes require in principle a COM decision. However, a transfer of an amount of up to 8 % of the initial allocation of a specific objective to another specific objective does not require a COM decision. In that case, the MS must simply submit to the COM the amended financing plan together with any "related changes" in the programme. These "related changes" include changes in target values.

#### Common result indicators during evaluation

MAs provide the monitoring data collected during implementation to the evaluators. The task of the evaluators is the systematic and objective assessment of the programme design, implementation and results, comparing – among other things – the targets set in the programme with the results achieved. The evaluation analyses whether or not targets have been achieved, reviews the assumptions made during the programming, and investigates the reasons that led to achievement or non-achievement

The common result indicators offer a valuable quantitative base for the evaluation, although they do not cover all possible aspects to be evaluated. Additional evaluation indicators might be needed.

The EMFAF common result indicators gain explanatory power when combined with Infosys data (among others NUTS location, type of intervention, type of operation, etc.). For example, the common result indicator "Innovations enabled" becomes more versatile when combined with the type of operation ("Innovations enabled – marketing", "Innovations enabled – product", etc.) and the type of beneficiary.

#### 2.12.3 Core performance indicators

Core performance indicators for EMFAF are predefined and will be used by the Commission in compliance with its reporting requirement pursuant to Article 41(3)(h)(iii) of Regulation (EU) No 2018/1046 (Financial Regulation). There are twelve core performance indicators and they will be used by the Commission to measure the achievement of objectives and results. They are included in Annex I of the EMFAF regulation.

When the Commission has to report on these core performance indicators, they can derive the values from the common result indicators and Infosys. Some of the core performance indicators are one to one with the common result indicators whereas others will require data extraction from Infosys. A full list of all the core performance indicators and their link to the common result indicators and Infosys is provided in Annex 3.3.

#### 2.13 Types of operations

Types of operations are precise thematic categories used to label single operations for EMFAF monitoring (Infosys). They are set in the Infosys Implementing Regulation and pertain to the operational level of the intervention logic.

When an operation is selected for implementation, MS (MAs, IBs or the beneficiary, as per the discretion of the MS) select the most appropriate "type" for each operation. Only one type is possible per operation; for complex operations the most representative type must be chosen.

A full list is provided in Annex 3.4.3.

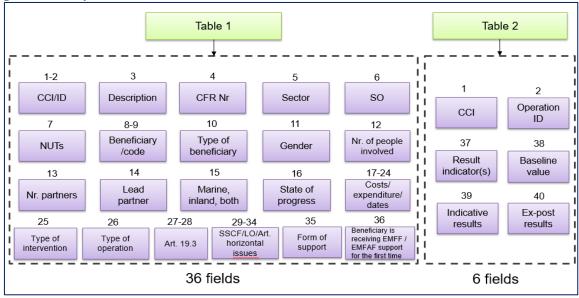

#### 2.14 Infosys

Infosys is the database structure for the collection and reporting of the EMFAF monitoring data. It is a valuable source of readily available data for evaluations and generation of policy information. Infosys data are combined with output and result indicator values.

Infosys consists of two tables (Figure 4), which correspond to table 1 and table 2 of Annex I of the Infosys Implementing Regulation:

- Table 1 has 36 fields focus on information about operations
- Table 2 has six fields focus on result indicators.

Figure 4: Infosys 2021-2027, structure

Source: FAME, 2021

Infosys 2021-2027 evolved organically from Infosys 2014-2020. Infosys 2021-2027 is considerably simpler that its predecessor, reduced from four annexes to two tables, with more uniform data fields, and the number of types of operations reduced from 160 to 66.

Data are collected at the individual operation level. It includes basic operation information, beneficiary information, financial data, type of operation (one per operation), result indicators (including baseline values, estimated result values before the operation, and values achieved after the operation). Data are reported twice per year (31 January and 31 July as of 31 January 2022). The entire Infosys structure is provided in Annex 3.4.

#### 2.15 Annual performance review (CPR Article 41)

Every year, COM will organise review meetings with each MS to examine the performance of each programme.

The review meetings shall be chaired by the COM or, if the MS so requests, co-chaired by the MS and the COM. The MS and the COM may agree not to organise an annual review meeting. In this case, the review may be carried out in writing.

The outcome of the annual review meeting shall be recorded in agreed minutes.

Requirements of the annual review meeting may be defined in a future implementing act.

#### 2.16 CPR Article 42 reporting

Under the MEF 2021-2027 the reporting will have three different levels, one of them pursuant to EMFAF Article 46 and two of them pursuant to Article 42 of the CPR (see figure below):

- 1. the operations' level, that is the Infosys in the narrow sense (see chapter 2.14, pursuant to EMFAF Article 46) similar to the 2014-2020 Infosys (twice a year, 31 January and 31 July)
- 2. the aggregated indicator values' level based on Infosys with possible corrections (same timing as Infosys, i.e. 31 January and 31 July every year)
- 3. the aggregated financial data, i.e. the number of selected operations, their total eligible cost, the contribution from the EMFAF and the total eligible expenditure declared by the beneficiaries to the MA, all broken down by type of intervention (5 times per year, 31 January, 30 April, 31 July, 30 September, 30 November)

31 January 30 April 31 July 30 September 30 November Infosys Infosys CPR Art. 42 CPR Art .42 CPR Art. 42 CPR Art. 42 CPR Art. 42 Financial Financial Financial Financial Financial reporting reporting reporting reporting reporting CPR Art. 42 CPR Art 42 reporting reporting Indicator Indicator values values

Figure 5: Timeline of CPR Article 42 reporting

Source: FAME 2021

The aggregated data of the EMFAF programme implementation pursuant to Article 42 of the CPR shall be transmitted by the MA electronically via the IT platform SFC. The design of the elements described herein allows for a largely automated processing of the relevant data (for example, aggregation is conducted at the level of the type of intervention chosen for each operation).

Reporting at the aggregated level as defined in Article 42 and the related Annex VII of the CPR should be based exclusively on the data submitted via Infosys. Therefore, a data aggregation tool, similar to the Infosys validation tool, is under development. The tool will aggregate Infosys data based on specific rules (for example counting only completed or fully implemented operations), flag problematic cases like double counting suspects, identify cases where overruling and manual intervention is necessary, and provide the MAs with an output to be inserted in the tables of the aforementioned CPR annex.

See annexes 3.4.1 and 3.4.2 for further explanations and technical details about Infosys and the links between reporting pursuant to article 42 of the CPR and article 46 of the EMFAF. See also annex 3.5 for technical specifications of aggregation rules for Article 42 reporting, CPR annex VII, tables 1, 4, 5, 9.

#### Good to know

#### Relation of Infosys reporting to Annex XVII of CPR

Annex XVII of CPR provides a list of data items to be recorded. The main objective of the Annex is to set out minimum data necessary to be recorded and stored electronically per operation (in a system or systems) by the MA for purposes of monitoring, evaluation, financial management, verification and audit – as set out in the CPR.

Annex XVII builds on both:

- Annex III to Delegated Regulation 480/2014 (106 fields to complete), and
- Implementing Act 821/2014 (41 fields and 59 sub-fields), specific to financial instruments.

Together, the 2014-2020 Delegated and Implementing Acts had 147 fields, similar to the size of Annex XVII. It needs to be emphasized, however, that not all fields apply to the EMFAF.

Several data fields in Annex XVII correspond to Infosys fields:

- fields describing data on the beneficiary (name and unique identifier of the beneficiary, whether the beneficiary is a natural or legal person);
- data on the operation (name and unique identifier of the operation, short description of the operation, date of the approval of the operation); CCI of the programme; priority or priorities of the programme(s) under which the operation is supported; name, baseline and target value for each result indicator;
- Financial data on each operation (amount of total eligible cost, total public cost and EMFAF contribution);
- Data on payment claims from the beneficiary (date of the last payment to the beneficiary).

#### 2.17 Evaluation plan and evaluation activities (CPR Article 44)

As with the current programming period, each MS will have to draw up an evaluation plan and submit it to their EMFAF monitoring committee no later than one year after the approval of the programme.

The evaluation plan should cover all evaluations foreseen for the programme period.

As for the EMFF 2014-2020, EMFAF evaluations should validate the results achieved, exploring how and why inputs, outputs and results contributed to the achievement of objectives. They should focus on effectiveness, efficiency, relevance, coherence and EU added value. FAMENET will provide methodological support for the formation of evaluation plans and related evaluation activities in the 2021-2027 period at a later stage.

MS will have to undertake the following evaluations:

- Evaluation on effectiveness, efficiency, relevance, coherence and EU added value;
- Impact evaluation to be carried out by 30 June 2029.

These evaluations by MS will feed the mid-term (end of 2024) and retrospective (end of 2031) evaluations to be conducted by the COM in the same framework. Article 44(3) states that MS

shall entrust the evaluations to "...internal or external experts who are functionally independent."

The main simplification in 2021-2027 is that an ex-ante evaluation (as required in 2014-2020) is no longer be required. The necessary information should be captured in the SWOT analysis and identification of needs in the programme.

#### 3 Annexes

 $^{^{\}rm 10}$  Annex IV of the EMFAF Regulation

#### 3.3 Common result indicators and core performance indicators

#### 3.3.1 Common result indicators, overview¹¹

Code	Common result indicator	Unit	Comment	Baseline in programme	Baseline of the single operation	Target/achievement in programme	Target/achievement of the single operation
CR01	New production capacity	Tonnes/annum	Applicable to all sectors	Zero	Production capacity before the operation	Sum of difference between target/achievement and baseline of each single operation	Production capacity AFTER the operation
CR02	Aquaculture production maintained	Tonnes/annum	Applicable mainly to aquaculture	Zero	Zero	Sum of targets/achievements of the single operations	Production maintained with the EMFAF support
CR03	Businesses created	Number of entities	An operation can create several businesses.	Zero	Zero	Sum of targets/achievements of the single operations	Businesses created with the EMFAF support
CR04	Businesses with higher turnover	Number of entities	An operation can lead to more businesses with higher turnover.	Zero	Zero	Sum of targets/achievements of the single operations	Businesses with higher turnover with the EMFAF support

¹¹ Annex I of the EMFAF Regulation. Several common result indicators are also core performance indicators: these are CR03, 04, 06, 07, 08, 10, 18.1, 18.2, 19, and 22. A full list of the core performance indicators is provided along with the result indicators in Annex I of the EMFAF Regulation. Annex 3.3.3 of this working paper contains the full list of core performance indicators and the link with common result indicators.

Code	Common result indicator	Unit	Comment	Baseline in programme	Baseline of the single operation	Target/achievement in programme	Target/achievement of the single operation
CR05.1	Capacity of vessels withdrawn	GT	For permanent cessation, programmes must use both sub-indicators 5.1 and 5.2 combined.  Temporary cessation should use "persons benefitting" and provide "FFR number"	Zero	Zero	Sum of targets/achievements of the single operations	Capacity (GT) of the vessel withdrawn
CR05.2		kW	As above	Zero	Zero	Sum of targets/achievements of the single operations	Capacity (kW) of the vessel withdrawn
CR06	Jobs created	Number of persons	Half persons are possible (FTE approximation)	Zero	Zero	Sum of targets/achievements of the single operations	Jobs created with the EMFAF support
CR07	Jobs maintained	Number of persons	As above	Zero	Zero	Sum of targets/achievements of the single operations	Jobs maintained with the EMFAF support

Code	Common result indicator	Unit	Comment	Baseline in programme	Baseline of the single operation	Target/achievement in programme	Target/achievement of the single operation
CR08	Persons benefiting	Number of persons	Specifically for this indicator, conservative calculations are paramount. Care should be taken to only report people <i>directly</i> benefitting, so that the number of persons benefitting is not overreported or exaggerated.	Zero	Zero	Sum of targets/achievements of the single operations	Persons <i>directly</i> benefitting with the EMFAF support
CR09.1	Area addressed by operations contributing to a good	km2	Natura 2000and other protected habitats and zones.	Zero	Zero	Sum of targets/achievements of the single operations	km2 covered with the EMFAF support
CR09.2	environmental status, protecting, conserving, and restoring biodiversity and ecosystems	km	Rivers and riparian zones.	Zero	Zero	Sum of targets/achievements of the single operations	Km covered with the EMFAF support

Code	Common result indicator	Unit	Comment	Baseline in programme	Baseline of the single operation	Target/achievement in programme	Target/achievement of the single operation
CR10	Actions contributing to good environmental status, including nature restoration, conservation, protection of ecosystems, biodiversity, fish health and welfare	Number of actions	Unlike CR9.1 and 9.2, this indicator applies to operations without a spatial dimension.  An operation can deliver several actions.	Zero	Zero	Sum of targets/achievements of the single operations	Actions implemented with the EMFAF support
CR11	Entities increasing social sustainability	Number entities	An operation can concern several entities.	Zero	Zero	Sum of targets/achievements of the single operations	Entities enhanced with the EMFAF support
CR12	Effectiveness of the system for "collection, management and use of data"	3 = high 2 = medium 1 = low	The quality of the national data collection programme as assessed by STECF, and the improvement achieved.	Status quo (1,2,3)	Status quo (1,2,3)	Average of the targets/achievements of the single operations	Status to be achieved or maintained (1,2, 3)

Code	Common result indicator	Unit	Comment	Baseline in programme	Baseline of the single operation	Target/achievement in programme	Target/achievement of the single operation
CR13	Cooperation activities between stakeholders	Number of actions	An operation can deliver several cooperation activities.	Zero	Zero	Sum of targets/achievements of the single operations	Cooperation facilitated enhanced with the EMFAF support
CR14	Innovations enabled	Number of new products, services, processes, business models or methods	An operation can deliver several innovations of different types and in different sectors.	Zero	Zero	Sum of targets/achievements of the single operations	Innovations enabled with the EMFAF support
CR15	Control means installed or improved	Number of means	An operation can include several means installed on a single vessel.  Beneficiaries need to provide "FFR number"	Zero	Zero	Sum of targets/achievements of the single operations	Systems installed or improved with the EMFAF support
CR16	Entities benefiting from promotion and information activities	Number of entities	An operation can concern several entities.	Zero	Zero	Sum of targets/achievements of the single operations	Entities participating with the EMFAF support

Code	Common result indicator	Unit	Comment	Baseline in programme	Baseline of the single operation	Target/achievement in programme	Target/achievement of the single operation
CR17	Entities improving resource efficiency in production and/or processing	Number of entities	An operation can concern several entities.	Zero	Zero	Sum of targets/achievements of the single operations	Entities improved with the EMFAF support
CR18.1	Energy consumption leading to CO ₂	kWh/tonnes	Measurement of CO ₂ emissions reduction requires further calculation. FAMENET will provide the methodology.	Zero	Energy need per tonne of produce and year BEFORE the operation	Average of difference between target/achievements and baseline of each single operation	Energy need per tonne of produce and year AFTER the operation
CR18.2	emissions reduction	litres/hour	As above	Zero	Consumption per hour BEFORE the operation	Average of difference between target/achievements and baseline of each single operation	Consumption per hour AFTER the operation
CR19	Actions to improve governance capacity	Number of actions	An operation can deliver several actions.	Zero	Zero	Sum of targets/achievements of the single operations	Actions facilitated with the EMFAF support

Code	Common result indicator	Unit	Comment	Baseline in programme	Baseline of the single operation	Target/achievement in programme	Target/achievement of the single operation
CR20	Investment induced	EUR	Investment made after a project, as a direct consequence of an operation's enabling actions. To be clear, this differs from investments in a project. Investment can be financed through private or public funds. Investment induced is not the private funds included in the operation itself.	Zero	Zero	Sum of targets/achievements of the single operations	Investments induced through the implementation of a project with EMFAF support
CR21	Datasets and advice made available	Number	An operation can deliver several datasets and advice pieces.	Zero	Zero	Sum of targets/achievements of the single operations	Datasets and advice made available with EMFAF support
CR22	Usage of data and information platforms	Number of page views	Number of views over the course of the operation.	Zero	Zero	Sum of targets/achievements of the single operations	Usage of data during the implementation of a project with EMFAF support

## 3.3.2 Common result indicators, fiches¹²

CR01	New production capacity
Indicator name	New production capacity
Measurement unit	Tonnes/annum
Definition	Increase in the maximum potential for production or processing of fish, calculated in product weight per year (aquaculture and processing) respective to customs of the exact product (for example, with or without shell)
Further clarification	<ul> <li>indicator refers to the potential for additional, new production capacity based on the facility specifications. Actual production prediction is difficult due to market fluctuations</li> <li>volume intended for sale for human consumption</li> <li>sector defined in a specific Infosys field</li> </ul>
Further clarification direct	n/a
management	
Programme level	
Clarification	<ul> <li>in the programme, the indicators should express the sum of the change of production capacity per year through EMFAF support.</li> <li>the baseline and target values are different from the indicator at the operation level</li> </ul>
Baseline value	• the baseline value in the programme is zero
Target values	<ul> <li>target values should be defined separately for each specific objective ex-ante</li> <li>target value of zero indicates "no change", meaning the maintenance of the status quo</li> <li>estimation of target values should be based on beneficiary input and experience from historic values or benchmarks from other operations</li> <li>the target value achievements is the sum of the achievements of all operations</li> </ul>
Operation level	
Inputs from the beneficiary	<ul> <li>volume of production capacity before and after the operation.</li> <li>volume of new production capacity should be reported for the capacity of production units directly involved in the operation. In the case of micro- and very small companies, the volume of new production capacity of the whole company can be reported. In the case of large companies, only the volume of new production capacity of the department/location involved in the operation should be reported</li> </ul>
Inputs from other sources	n/a
Inputs from the MA/ Input from contracting authority (direct management)	n/a
Reference period for the single operation	duration of the operation
Baseline for the single operation	production capacity before the operation

 $^{^{12}}$  Regulation (EU) 2021/1139 of the European parliament and of the Council of 7 July 2021 establishing the European Maritime, Fisheries and Aquaculture Fund and amending Regulation (EU) 2017/1004, Annex I.

CR01	New production capacity
Target value	• ex-ante assumption of the target value
Achieved value	<ul> <li>production capacity at the time of completion</li> </ul>
Example at the operation	A local oyster farmer decides to grow her business, and uses
level	EMFAF funds to invest in her oyster farming operations in one
	location out of two where the business is active, hence increasing
	production capacity.
	To provide data for CR01: "New production capacity", she must
	report on the potential harvest in tonnes per annum of oysters before
	the investment in the specific farm area, and the potential harvest in
	tonnes per annum of oysters after the investment in the farm area.

CR02	Aquaculture production maintained
Indicator name	Aquaculture production maintained
Measurement unit	Tonnes/annum
Definition	Maintenance of capacity for aquaculture production
Further clarification	• indicator refers to the potential production capacity maintained
	based on the facility specifications, not to actual production. Actual
	production prediction is difficult due to market fluctuations. The
	attention is on the maintenance of the activity
	<ul> <li>volume intended for sale for human consumption</li> </ul>
	• sector defined in a specific Infosys field; the indicator can be used
	for aquaculture and processing
Further clarification direct	n/a
management	
Programme level	
Clarification	• in the programme the indicators should express the sum of
	maintained production capacity per year with the support of the
	EMFAF
Baseline value	• the baseline value in the programme is zero
Target values	• target values should be defined separately for each specific
	objective ex-ante
	• target value is the sum of the maintained production capacity.
	• estimation of target values should be based on beneficiary input
	and experience from historic values or benchmarks from other
	operations
	• the target value achievements will be calculated based on the total
	results achieved at operational level
Operation level	
Inputs from the beneficiary	• volume of production capacity maintained after the operation
	• volume of production capacity maintained should be reported for
	the capacity of production units directly involved in the operation.
	In the case of micro- and very small companies, the volume of
	production capacity maintained of the whole company can be
	reported. In the case of large companies, only the volume of
	production capacity maintained of the department/location
	involved in the operation should be reported
Inputs from other sources	n/a
Inputs from the MA/ Input	n/a

CR02	Aquaculture production maintained
from contracting authority	
(direct management)	
Reference period for the	<ul> <li>duration of the operation</li> </ul>
single operation	
Baseline for the single	• zero
operation	
Target value	<ul> <li>ex-ante assumption of the target value</li> </ul>
Achieved value	<ul> <li>maintained production capacity at the time of completion</li> </ul>
Example at the operation	A local carp farmer invests in maintaining the infrastructure of their
level	concrete ponds, implementing a construction project to fortify and
	upgrade the old and degraded ponds.
	While the production is not increased, the pond remains operational.
	To provide data for CR02: "Aquaculture production maintained" the
	farmer must report on the potential harvest of carp in tonnes per
	annum that would have been abandoned, had the pond not been
	maintained.

CR03	Businesses created
Indicator name	Businesses created
Measurement unit	Number of entities
Definition	Number of businesses created based on formal registration of these businesses in the appropriate registry of the MS
Further clarification	<ul> <li>all businesses are eligible regardless of size, legal form (sole operator, limited or stock company, other forms) and turnover</li> <li>for businesses requiring extensive approvals or permits before commencing operations, preliminary business registration prior to approval or granting of permits also count as formal registration for this indicator</li> <li>the beneficiary can also be a different entity from the business founder</li> <li>for a professional organisation within the meaning of the CMO regulation, "business created" refers to formally recognised producer organisations, associations thereof and inter-branch organisations</li> <li>for CLLD, "business created" refers to all types of new entities registered in the FLAG area, relevant to the Local Development Strategy (LDS), where creation can plausibly be attributed to an EMFAF intervention; operations do not need to be directly related to the fisheries, aquaculture or maritime sectors</li> </ul>
Further clarification direct	this should include any start-ups or scale-ups receiving support
management	through grants or financial instruments or benefiting from assistance
Programme level	
Clarification	• in the programme the indicator should provide the number of businesses created with EMFAF support
Baseline value	• the baseline value in the programme is zero
Target values	• target values should be defined separately for each specific objective

CR03	Businesses created
	<ul> <li>estimation of target values should be based on surveys among beneficiaries, studies, statistics or experience from the programming period 2014-2020</li> <li>the target value achievements will be calculated based on the sum</li> </ul>
	of results achieved at operational level
Operation level	
Inputs from the beneficiary	<ul> <li>number of businesses created based on formal documentation</li> <li>number of professional organisations in the meaning of the Regulation (EU) No 1308/2013 and relevant delegated acts</li> </ul>
Inputs from other sources	n/a
Inputs from the MA/ Input from contracting authority (direct management)	n/a
Reference period for the single operation	duration of the operation
Baseline for the single operation	• zero
Target value	ex-ante assumption of the target value
Achieved value	<ul> <li>number of business created at completion or up to a certain number of years after the completion of the operation, depending on the MA rules for data collection (the general rule is: the later, the better)</li> </ul>
Calculation	n/a
Examples at the operation level	A FLAG supports a local fisher to diversify and establish new companies in the area with a series of actions (advisory service, support in the form of feasibility studies, help with business plans, etc.).
	A number of fishers establish a limited company to serve the local tourism sector with fresh local seafood.
	The beneficiary registers the company, which is operational before the end of the EMFAF operation, and reports 1 business created.

CR04	Businesses with higher turnover
Indicator name	Businesses with higher turnover
Measurement unit	Number of entities
Definition	Number of businesses which achieved a higher turnover thanks to EMFAF support
Further clarification	<ul> <li>all businesses are eligible regardless of size, legal form (sole operator, limited or stock company) and turnover</li> </ul>
Further clarification direct management	<ul> <li>for direct management, this should include any start-ups or scale- ups receiving support through grants or financial instruments or business assistance</li> </ul>
	<ul> <li>for direct management it should not include businesses benefiting from information or data that is publicly available</li> </ul>
Programme level	
Clarification	• in the programme the indicator should provide the number of businesses with higher turnover thanks to EMFAF support
Baseline value	• the baseline value in the programme is zero

CR04	Businesses with higher turnover
Target values	<ul> <li>target values should be defined separately for each specific objective</li> <li>estimation of target values should be based on surveys among beneficiaries, studies, statistics or experience from the programming period 2014-2020</li> <li>the target value achievements will be calculated based on the sum of results achieved at operational level</li> </ul>
Operation level	
Inputs from the beneficiary	<ul> <li>indication whether their business has a higher turnover</li> <li>if more than one business is involved in the operation, then the sum of all businesses with a higher turnover should be reported.</li> </ul>
Inputs from other sources	n/a
Inputs from the MA/Input from contracting authority (direct management)	n/a
Reference period for the single operation	duration of the operation
Baseline for the single operation	• zero
Target value	• ex-ante assumption of the target value (1 or more)
Achieved value	• number of businesses with higher turnover at completion or up to a certain number of years after the completion of the operation, depending on the MA rules for data collection (the general rule is: the later, the better)
Calculation	n/a
Example at the operation level	An operator invests in infrastructure or introduces a new product with EMFAF support. As a direct consequence she or he can operate more efficiently, increase production and reach new markets. The resulting increased turnover would have been impossible without EMFAF support. The beneficiary can verify the higher turnover by comparing profit and loss accounts before and afterwards, and reports one business with higher turnover.

CR05.1/CR05.2	Capacity of vessels withdrawn (GT/kW)
Indicator name	5.1 Capacity of vessels withdrawn in gross tonnes (GT)
	5.2 Capacity of vessels withdrawn in kilowatt (kW)
Measurement unit	5.1 Gross tonnes (GT)
	5.2 Kilowatt (kW)
Definition	5.1 Capacity of vessels withdrawn permanently from the fleet in
	gross tonnes
	5.2 Capacity of vessels withdrawn permanently from the fleet in
	kilowatts
Further clarification	• this indicator is specifically for <i>permanent cessation</i> . Infosys should include the FFR number.
	• for temporary cessation operations, MA should rather choose
	CR08: "persons benefitting", and provide the FFR number in
	Infosys.
Further clarification direct	n/a
management	

CR05.1/CR05.2	Capacity of vessels withdrawn (GT/kW)
Programme level	
Clarification	<ul> <li>in the programme the indicator should provide the total capacity of vessels withdrawn with EMFAF support</li> <li>programmes need to use both indicators if permanent cessation is included in the programme</li> </ul>
Baseline value	• the baseline value in the programme is zero for CR05.1 and CR05.2
Target values	<ul> <li>estimation of target values should be based on surveys among beneficiaries, studies, statistics or experience from the programming period 2014-2020</li> <li>the target value achievements will be calculated based on the sum of results achieved at operational level</li> </ul>
Operation level	
Inputs from the beneficiary	<ul> <li>05.1 GT of their vessel withdrawn</li> <li>05.2 kW of their vessels withdrawn</li> <li>FFR number</li> </ul>
Inputs from other sources	n/a
Inputs from the MA/ Input from contracting authority (direct management)	This indicator might be used in relation to a Simplified Cost Option (SCO) ¹³
Reference period for the single operation	• duration of the operation
Baseline for the single operation	• zero
Target value	<ul> <li>05.1 GT of their vessels planned to be withdrawn</li> <li>05.2 kW of their vessels planned to be withdrawn</li> </ul>
Achieved value	<ul> <li>05.1 GT of their vessels actually withdrawn</li> <li>05.2 kW of their vessels actually withdrawn</li> </ul>
Example at the operation level	A fisher scraps his or her vessel, making use of the opportunity offered by the MA following the decision of national authorities to adjust the fleet capacity to the available fishing opportunities. The fisher reports the FFR number of the scrapped vessel and its capacity in GT and kW as per the official registration documentation.

CR06	Jobs created
Indicator name	Jobs created
Measurement unit	Number of persons
Definition	Employment of staff due to EMFAF investment (employed or self- employed for pay, profit or family gain)
Further clarification	Jobs should be created according to the legal provision of the MS.  The value of the CR is based on the report by the beneficiary based on their employment record.  Reporting half-persons is possible to approximate the full time equivalent approach; the calculation is as follows:  - full-time = 1 person

_

 $^{^{13}}$  See also EUROPEAN COMMISSION – Directorate-General for Maritime Affairs and Fisheries, Unit D.3 (2020): FAME SU: working paper EMFAF simplified cost options, Brussels

CR06	Jobs created
	- part-time = 0.5 person
	- seasonal or irregular = 0.3 person
	• in the case of individual fishers, the value is based on their own
	assessment
	• if no company records are available, fishers should estimate that
	the job created is either full- or part-time
	• in the case of companies, the jobs created should be based on
	company records
	• people employed temporarily to work on realisation of the
	operation (e.g. FLAG management, project coordination,
	researchers) should not be recorded here
	• in the case of representative organisations such as POs the value is
	based on their own assessment
	• jobs are expected to be permanent or – in the case of seasonal jobs
	- recurring
	<ul> <li>jobs are considered at the beneficiary level</li> </ul>
	• the indicator does not take account of qualitative factors such as
	educational level or salary
Further clarification direct	This covers only the beneficiary of the grant, financial instrument or
management	assistance, not those benefiting from data or information services.
Programme level	
Clarification	• in the programme the indicator should provide the number of jobs
	created with EMFAF support
Baseline value	the baseline value in the programme is zero
Target values	• target values should be defined separately for each specific
	objective
	• target values are expressed in persons, half persons are possible
	estimation of target values could be based on surveys among
	beneficiaries, studies, statistics or experience from the
	programming period 2014-2020
	• the target value achievements will be calculated based on the sum
0	of results achieved at operational level
Operation level	
Inputs from the beneficiary	• number of newly created jobs (persons)
	• the result indicator value should be as close as possible to the unit
	or location implementing the operation; if this is not possible, the number of jobs created during the operation should be linked to the
	whole company
	<ul> <li>in the case of large companies, it should be linked to the relevant</li> </ul>
	department involved in the operation
Inputs from other sources	n/a
Inputs from the MA/ Input	• the MA might assist beneficiaries to define the number of persons
from contracting authority	in case of part time employees
(direct management)	in case of part time employees
Reference period for the	duration of the operation
single operation	duration of the operation
Baseline for the single	• zero
operation	
Target value	ex-ante assumption of the target value
<u> </u>	1

CR06	Jobs created
Achieved value	Number of newly created jobs (persons) at completion or up to a certain number of years after completion of the operation, depending on the MA rules for data collection (the general rule is: the later, the better)
Example at the operation level	An entrepreneurial young fisherwoman decides to start her own business and uses EMFAF funding to develop her own small-scale commercial fishing company. The new company hires a full-time salesperson and a part-time logistics assistant. These jobs would not be there without EMFAF support. The beneficiary reports 1.5 persons with jobs created.

CDOF	
CR07	Jobs maintained
Indicator name	Jobs maintained
Measurement unit	Number of persons
Definition	Retention of staff due to EMFAF investment (employed or self-
	employed for pay, profit or family gain)
Further clarification	The indicator includes only jobs that would have been lost without the EMFAF operation.
	The value of the CR is based on the report by the beneficiary based
	on their employment record.
	Reporting half-persons is possible to approximate the full time
	equivalent approach; the calculation is as follows:
	- full-time = 1 person
	- part-time = 0.5 person
	- seasonal or irregular = 0.3 person
	• in the case of individual fishers, the value is based on their own
	assessment
	• if no company records are available, fishers should estimate that the job created is either full- or part-time
	• in the case of companies, the jobs created should be based on company records
	<ul> <li>people employed temporarily to work on realisation of the operation (e.g. FLAG management, project coordination, researchers) should not be recorded here</li> </ul>
	• in the case of representative organisations such as POs the value is based on their own assessment
	• jobs are expected to be permanent or – in the case of seasonal jobs – recurring
	• jobs are considered at the beneficiary level
	• the indicator does not take account of qualitative factors such as
	educational level or salary
Further clarification direct	For direct management this only covers the beneficiary of grant or
management	financial instrument, not those benefiting from assistance or data
	access
Programme level	
Clarification	• in the programme the indicator should provide the estimated
	number of jobs maintained following EMFAF support

CR07	Jobs maintained
Baseline value	• the baseline value in the programme is zero
Target values	target values should be defined separately for each specific objective
	• target values are expressed in persons
	<ul> <li>estimation of target values could be based on surveys of beneficiaries, studies, statistics or experience from the programming period 2014-2020</li> </ul>
	• the target value achievements will be calculated based on the sum
	of results achieved at operational level
Operation level	
Inputs from the beneficiary	<ul> <li>number of jobs maintained (persons)</li> <li>the result indicator value should be as close as possible to the unit</li> </ul>
	or location implementing the operation
	• if this is not possible, the number of jobs maintained during the operation should be linked to the whole company
	<ul> <li>in the case of large companies, it should be linked to the relevant department involved in the operation</li> </ul>
Inputs from other sources	n/a
Inputs from the MA/Input from contracting authority (direct management)	• the MA might assist beneficiaries to define the number of persons in case of part time employees
Reference period for the single operation	duration of the operation
Baseline for the single operation	• zero
Target value	• ex-ante assumption of the target value
Achieved value	<ul> <li>number of jobs maintained (persons) at the completion of the operation</li> </ul>
Example at the operation level	A local aquaculture producer loses market shares due to price competition and inefficient production equipment. EMFAF helps them invest in new processing facilities and thus they are able to produce with increases cost efficiency. None of the employees needs to be laid off.  The beneficiary registers the number of employees that would have
	been fired but were kept in the business with the EMFAF support.

CR08	Persons benefiting
Indicator name	Persons benefiting
Measurement unit	Number of persons
Definition	Persons directly benefiting from an activity with EMFAF support,
	for example training, installation of new equipment, provision of
	improved services, temporary cessation, etc.
Further clarification	<ul> <li>as a general rule, a conservative estimate is recommended – for example, only people actively participating in a training course, not their colleagues not attending, although they benefit indirectly, or only the specific users of a local service, not the municipality as a whole (a few thousand people)</li> <li>in the case of large companies, the number of persons benefitting should be calculated at the level of departments directly involved</li> </ul>

CR08	Persons benefiting
	Examples include:
	<ul> <li>participants in a training session or a meeting</li> </ul>
	<ul> <li>persons acquiring new skills or knowledge</li> </ul>
	• fishers benefiting from temporary cessation
	• number of people benefiting from acquisition of safety equipment
	or improved working conditions on board and on land in the
	fisheries sector (fishing, aquaculture, processing)
	• number of people benefiting from new or improved local services
Further clarification direct	As for shared management
management	
Programme level	
Clarification	• in the programme the indicator is the number of persons
	benefitting thanks to EMFAF support
Baseline value	• the baseline value in the programme is zero
Target values	target values should be defined separately for each specific
	objective
	• estimation of target values could be based on monitoring data and
	experience from the programming period 2014-2020
	• the target value achievements will be calculated based on the sum
	of results achieved at operational level
Operation level	•
Input from beneficiary	• number of persons directly benefiting from the actions, e.g.
	receiving training, using safety equipment, participating in a
	knowledge exchange, benefiting from temporary cessation
	• if it is not possible to estimate the number of persons benefitting
	directly from the operation, it is also possible to calculate the
	number of employees of the companies addressed by the
	beneficiary
	double counting can easily occur and should be avoided where
	possible
Inputs from other sources	n/a
Inputs from the MA/ Input	n/a
from contracting authority	
(direct management)	
Reference period for the	<ul> <li>duration of the operation</li> </ul>
single operation	
Baseline for the single	• zero
operation	
Target value	• ex-ante assumption of the target value
	• target values estimated ex-ante should be chosen based on realistic
	assumptions
Achieved value	• number of persons benefitting at the completion of the operation
Example at the operation	A local committee of lobster fishers organises a training course
level	using EMFAF funding to teach the practice of v-notching their local
	lobster stock. By making a small notch in the tail of each egg-
	bearing female lobster they encounter, they can quickly identify
	breeding lobsters and thus protect the stock.
	For this operation, the organisers of the event would provide the

CR08	Persons benefiting
	total number of individuals who participated in the event and
	completed the training.

CD00 1/CD00 2	Area addressed by operations contributing to good
CR09.1/CR09.2	environmental status, protecting, conserving, and restoring biodiversity and ecosystems
Indicator name	Area addressed by operations contributing to good environmental status, protecting, conserving and restoring biodiversity and ecosystems (km2)  Area addressed by operations contributing to good environmental status, protecting, conserving and restoring biodiversity and ecosystems (km)
Measurement unit	<ul> <li>09.1</li> <li>km2 of marine protected area (MPA)</li> <li>km² of Natura 2000 area</li> <li>km² of other protected area (e.g. inland water)</li> <li>09.2</li> <li>km of river or river segment</li> </ul>
Definition	Protected area as per its Standard Data Form (for Natura 2000 areas) or, in the case of other MPAs, its designation decree
Further clarification	<ul> <li>the entire protected area in which the operation occurs should be counted, regardless of the extent of a specific operation, unless there is a distinct spatial focus of the operation, and an exact measurement of km² is possible and meaningful (alternatively CR10 can be used)</li> <li>this includes establishing new areas but also protecting and restoring biodiversity or ecosystems in an area that already has protected status</li> <li>formal or legal protected status of the area is not required</li> <li>it is sufficient that an operation is within the designated area and is clearly linked to the conservation management of the area in accordance with the requirements under the Birds 2009/147/EC or Habitats 92/43/EEC directives or the MSFD 2008/56/EC (see also CFP Article 11)</li> <li>other types of protected areas should be linked to the national ecosystem protection strategies or other relevant strategies</li> <li>this indicator can be also used for aquaculture providing environmental services when the type of operation is "27 Environmental services" when the farm is inside such a protected area. In that case the beneficiary should only provide the area of the farm within the protected area.</li> </ul>
Further clarification direct management	n/a
Programme level	
Clarification	• in the programme the indicator is km² or km of protected area addressed with EMFAF support
Baseline value	• the baseline value in the programme is zero for CR09.1 and CR09.2

	Area addressed by operations contributing to good
CR09.1/CR09.2	environmental status, protecting, conserving, and restoring
CROS.17 CROS.2	biodiversity and ecosystems
Target values	target values should be defined separately for each specific
	objective
	• estimation of target values could be based on experience from the
	programming period 2014-2020, or on national strategies and plans
	• the target value achievements will be calculated based on the sum
	of results achieved at operational level
Operation level	
Inputs from the beneficiary	• 09.1 km² of the protected area concerned
	09.2 km of protected river
	<ul> <li>double counting, for example when the same protected area or river management body is beneficiary of two separate operations,</li> </ul>
	can occur easily and should be avoided where possible or flagged
	for example by including the area code in the project name
	• In case of aquaculture providing environmental services (i.e. the
	type of operation is "27 Environmental services") the beneficiary
	should only provide the area of the farm within the protected area
Y	and not the spatial extent of the entire area.
Inputs from other sources	agencies responsible for the management of protected areas can  deliver the list of officially designed dMDAs at a reference data.
	deliver the list of officially designated MPAs at a reference date, which should contain the spatial extent as a verification of the
	beneficiary data
Inputs from the MA/Input	the MA should make sure to use the correct measurement unit
from contracting authority	(km ² ) and check the conversions of figures in other units (e.g.
(direct management)	hectares or acres) from the beneficiary or other sources
	• the MA should add the area code in the name of the operation in
D. 6	Infosys to reduce double counting
Reference period for the single operation	duration of the operation
Baseline for the single	The baseline value is zero
operation	The busefile value is zero
Target value	ex-ante assumption of the target value
Achieved value	CR09.1
	• km² of marine protected area (MPA) at completion of the operation
	• km² of Natura 2000 area at completion of the operation
	• km² of other protected area (e.g. inland water) at completion of the
	operation
	CR09.2
Example at the operation	<ul> <li>km of river or river segment</li> <li>A Natura 2000 management body invests in infrastructure needed for</li> </ul>
level	habitat and species protection. The situation of biodiversity and
	ecosystems is improved in the specific Natura 2000 area. The
	beneficiary reports the extent of the area as per its Standard Data.
	An aquaculture operator uses cultivation techniques that support
	biodiversity, enhance the landscape, and improve the quality of
	water, air and soil such as extensive farming within a protected area.

CR09.1/CR09.2	Area addressed by operations contributing to good environmental status, protecting, conserving, and restoring biodiversity and ecosystems
	The beneficiary reports the spatial of extent of her farm only (in km2).

	Actions contributing to good environmental status including
CR10	nature restoration, conservation, protection of ecosystems,
	biodiversity, fish health and welfare
Indicator name	Actions contributing to good environmental status including nature restoration, conservation, protection of ecosystems, biodiversity, fish health and welfare
Measurement unit	Number of actions
Definition	Actions protecting, conserving and restoring biodiversity and ecosystems that CANNOT be expressed in terms of area (being a point action or intangible)
Further clarification	Actions can relate to:
	<ul> <li>conservation measures under Article 7 and Article 11 (if not covered by CR09) of the CFP Regulation</li> </ul>
	<ul> <li>restoring ecological continuity of rivers, restocking of marine and inland water, environmental services and specific investments for improving aquatic habitats and biodiversity such as investment in demarcating areas, artificial reefs, rebuilding fish banks, river revitalisation</li> </ul>
	<ul> <li>refurbishment and equipment of vessels to meet CFP and IMP requirements</li> </ul>
	marine litter collection
	<ul> <li>animal welfare</li> </ul>
	extraordinary cessation when dictated by conservation reasons
	<ul> <li>collection or processing of data to measure environmental status</li> </ul>
	<ul> <li>development of indicators for the environment</li> </ul>
	aquaculture providing environmental services (in case no spatial extent can be reported under CR09.1)
Further clarification direct	Only one indicator per action (yes/no)
management	
Programme level	
Clarification	• in the programme the indicator is the number of actions addressing nature restoration and protection needs of biodiversity and ecosystems with EMFAF support
Baseline value	the baseline value in the programme is zero
Target values	target values should be defined separately for each specific objective
	• estimation of target values could be based on experience from the programming period 2014-2020, or on national strategies and plans
	the target value achievements will be calculated based on the sum of results achieved at operational level
	<ul> <li>one operation can include one or several actions</li> </ul>
Operation level	one operation can include one of several actions
Inputs from the beneficiary	number of actions implemented
inputs from the belieficially	<ul> <li>number of actions implemented</li> </ul>

CR10	Actions contributing to good environmental status including nature restoration, conservation, protection of ecosystems, biodiversity, fish health and welfare
Inputs from other sources	n/a
Inputs from the MA/ Input from contracting authority (direct management)	<ul> <li>advice to the beneficiary in terms of what constitutes an action</li> <li>the MA could add the area code in the name of the operation in Infosys to reduce double counting</li> </ul>
Reference period for the single operation	duration of the operation
Baseline for the single operation	the baseline value is zero
Target value	<ul> <li>ex-ante assumption of the target value</li> </ul>
Achieved value	• number of actions implemented at the completion of the operation
Example at the operation level	The beneficiary, the national agency for biodiversity, works with the regional fisheries committees and Natura 2000 management bodies to develop a guide for the implementation of management and mitigation measures. Three pilot schemes are implemented in an equal number of protected areas.  The beneficiary reports four actions (one guide and three pilots).

CR11	Entities increasing social sustainability
Indicator name	Entities increasing social sustainability  Entities increasing social sustainability
Measurement unit	Number of entities
Definition	Number of entities that contribute to social sustainability (well-being and fair standard of living)
Further clarification	Actions related to improving gender equality, employment of long-term unemployed, people with disabilities. Indicator to address the social objectives of the EMFAF. Examples are:  • employment of people who are older than 54, disadvantaged, long-term unemployed, inactive, refugees, people with disabilities • improved working conditions • improved health and safety conditions • better work-life balance • involving disadvantaged communities • entities include businesses, FLAGs, NGOs and POs
Further clarification direct	This covers only the beneficiary of the grant, contract or financial
management	instrument
Programme level	
Clarification	• in the programme the indicator is the number of entities increasing social sustainability following EMFAF support
Baseline value	• the baseline value in the programme is zero
Target values	<ul> <li>target values should be defined separately for each specific objective</li> <li>estimation of target values could be based on a share of the average number of entities participating in EMFAF compared to the share of total entities in the MS that address social sustainability</li> </ul>
	<ul> <li>the target value achievements will be calculated based on the sum of results achieved at operational level</li> </ul>

CR11	Entities increasing social sustainability
Operation level	
Inputs from the beneficiary	• number of entities
Inputs from other sources	n/a
Inputs from the MA/ Input	n/a
from contracting authority	
(direct management)	
Reference period for the	• duration of the operation
single operation	
Baseline for the single	• the baseline value is zero
operation	
Target value	• ex-ante assumption of the target value
Achieved value	<ul> <li>number of entities at completion of the operation</li> </ul>
Example at the operation	The beneficiary, a FLAG, helps a cooperative of fishers and a
level	women's club in a coastal community to develop a job swapping
	mechanism for seasonal jobs to increase the employment of people
	over 54.
	The beneficiary reports two entities increasing social sustainability
	(the fishers' cooperative and the women's club).

CR12	Effectiveness of the system for "collection, management and use of data"
Indicator name	Effectiveness of the system for "collection, management and use of data"
Measurement unit	Ordinal scale: 3 = high, 2 = medium, 1 = low
Definition	Ability of state authorities, agencies and related bodies to meet the requirements of the regulations relating to data collection (Regulation (EU) 2017/1004 and related legislation).  The quality of the national data collection programme responses is assessed by STECF. The assessment of the improvement made and the selection of the value is done by the MA and/or the national correspondent.
Further clarification	<ul> <li>this CR relates to the whole national data collection program as outlined in the corresponding National Work Plan (Article 6 of EU 2017/1004 and/or forthcoming regulations)</li> <li>the data collection programme is composed of several parts, which may be funded together or separately in different MS; however, the CR is not related to separate individual operations which may be funded by EMFAF for this purpose</li> <li>in case the MS reports various operations, all operations in a given year should have the same values</li> <li>the judgment of effectiveness is provided by the National Correspondent, who is responsible for the implementation of the whole data collection programme based on correspondence with the STECF</li> <li>for the landlocked countries the CR relates to their implementation of their programme, which, in contrast to the coastal MS might just include a number of pilot studies</li> </ul>
Further clarification direct	n/a
management	

CR12	Effectiveness of the system for "collection, management and use of data"
Programme level	
Clarification	• in the programme the indicator is the change in the effectiveness of the system for "collection, management and use of data" of the required quality following EMFAF support
Baseline value	• the baseline value of this indicator cannot be lower than 1
Target values	• the target value should always be greater than or equal to the baseline value
	• estimation of target values could be based on monitoring data and experience from the programming period 2014-2020
	• it is assumed that there is only a limited number of operations, e.g. two per programming period corresponding to the DCF work programmes
Operation level	
Inputs from the beneficiary	• judgement by the National Correspondent, supported by a brief justification for the MA's records
Inputs from other sources	• judgement of the National Correspondent can be based on the annual STECF report "Evaluation of DCF AR and transmission issues, Annex 2 – Data Transmission Results" or other suitable official documentation
Inputs from the MA/ Input from contracting authority (direct management)	n/a
Reference period for the single operation	duration of the operation
Baseline for the single operation	• the baseline value of this indicator cannot be lower than 1
Target value	• ex-ante assumption of the target value
Achieved value	• effectiveness of the system for "collection, management and use of data" at completion of the operation
Example at the operation level	The MS responds to the data calls and its obligations according to the national data collection programme. The STECF assesses the quality of the responses and documents them in the annual STECF reports and related annexes. The MA or the national correspondent reviews and synthesizes the STECF reports and decides for one of the values possible (1,2,3). If more than one operation is implemented in one year, they should have the same value.

CR13	Cooperation activities between stakeholders
Indicator name	Cooperation activities between stakeholders
Measurement unit	Number of actions
Definition	Number of new sustainable cooperation activities implemented that involve more than one partner/entity/institution (includes businesses, FLAGs, NGOs, POs, APOs, IBOs, training and governmental organisations)
Further clarification	Cooperation is defined as any activity that includes two or more partners/entities/institutions. The cooperation should involve a sustainable result such as an agreement, initiative, joint business,

CR13	Cooperation activities between stakeholders
	project, product, innovation, memorandum of understanding,
	consultation process, joint learning, etc.
	Cooperation includes for example:
	<ul> <li>cooperation on fisheries control and coastguard operations (e.g.</li> </ul>
	Frontex and EFCA)
	• regional maritime cooperation in support of integrated governance
	and maritime policy management
	<ul> <li>cooperation among ministries, agencies or regions within a single MS</li> </ul>
	• cooperation with other MS, EU agencies or initiatives
	<ul> <li>cooperation with third countries</li> </ul>
	CLLD cooperation includes:
	• all types of partners (fishers, researchers, local authorities,
	businesses, NGOs etc.)
Further clarification direct	Ocean partnerships, coastguard, RFMO support
management	
Programme level	
Clarification	• in the programme the indicator is the number of newly created
	cooperation activities following EMFAF support
Baseline value	the baseline value in the programme is zero
Target values	target values should be defined separately for each specific
	objective
	<ul> <li>estimation of target values could be based on monitoring data,</li> </ul>
	surveys and experience from the programming period 2014-2020
	• the target value achievements will be calculated based on the sum
	of results achieved at operational level
	• the target values may be close to estimated output values
Operation level	
Inputs from the beneficiary	number of cooperation activities
y	• the result indicator value should be as close as possible to the unit
	or location implementing the operation
Inputs from other sources	n/a
Inputs from the MA/ Input	n/a
from contracting authority	
(direct management)	
Reference period for the	duration of the operation
single operation	and the second s
Baseline for the single	• the baseline value is zero
operation	
Target value	ex-ante assumption of the target value
	• target values estimated ex-ante should be chosen based on realistic
	assumptions
Achieved value	number of cooperation actions implemented involving more than
	one partner/entity/institution addressed at the completion of the
	operation
Example at the operation	An NGO and a local research institute use EMFAF funds to combine
level	their resources and expertise to research the effects of a cessation of
	fishing activities on the local cod stock. This operation results in one
	"cooperation activity" and thus the beneficiaries would report a

CR13	Cooperation activities between stakeholders
	value of 1 for CR13: "Cooperation activities between stakeholders"
	at the operation level.

CR14	Innovations enabled
Indicator name	Innovations enabled
Measurement unit	Number of new products, services, processes, business models or methods
Definition	Number of innovations, which are implemented or tested for new
	products, services, processes or business models
Further clarification	<i>Innovation activities</i> include all developmental, financial and commercial activities undertaken by a firm that are intended to result in an innovation for the firm. The OSLO manual defines ¹⁴ :
	A <i>business innovation</i> is a new or improved product or business process (or combination thereof)that differs significantly from the firm's previous products or business processes and that has been introduced on the market or brought into use by the firm.
	A <i>product innovation</i> is a new or improved good or service that differs significantly from the firm's previous goods or services and that has been introduced on the market.
	A <i>business process innovation</i> is a new or improved business process for one or more business functions that differs significantly from the firm's previous business processes and that has been brought into use by the firm.
	<ul> <li>In the EMFAF context this may include:</li> <li>identification or application of innovations that are useful in finding marketing solutions</li> <li>identification or application of new ideas that are useful in finding solutions to issues of business processes (e.g. more sustainable fishing)</li> <li>identification or application of new ideas that result in new products and services (e.g. environmental and social services)</li> <li>support for changes or improvements in a series of linked tasks or activities to better help businesses reach their goals</li> <li>Mere studies, research and advice on potential innovations in the future are excluded.</li> </ul>
Further clarification direct	for direct management this should only include innovations
management	enabled through a grant or financial instrument to a beneficiary – not those supported by assistance or data services
	• for direct management there should normally be a maximum of one
<b>D</b>	innovation per action
Programme level	
Clarification	• in the programme the indicator is the number of innovations enabled following EMFAF support

_

 $^{^{\}rm 14}$  Oslo Manual 2018: Guidelines for Collecting, Reporting, and Using Data on Innovation

CR14	Innovations enabled
Baseline value	• the baseline value in the programme is zero
Target values	<ul> <li>target values should be defined separately for each specific objective</li> </ul>
	<ul> <li>estimation of target values could be based on monitoring data, surveys and experience from the programming period 2014-2020</li> </ul>
	• the target value achievements will be calculated based on the sum of results achieved at operational level
	• one operation can include one or several innovations, hence the estimated value can be close to the estimated output value
Operation level	
Inputs from the beneficiary	<ul> <li>number of innovations enabled</li> </ul>
	• the result indicator value should be as close as possible to the unit or location implementing the operation
Inputs from other sources	n/a
Inputs from the MA/ Input	n/a
from contracting authority	
(direct management)	
Reference period for the single operation	duration of the operation
Baseline for the single operation	• the baseline value is zero
Target value	• ex-ante assumption of the target value
Achieved value	• number of innovations per operation at completion, or up to a certain number of years after the completion of the operation, depending on the MA rules for data collection (the general rule is: the later, the better).
Example at the operation	The beneficiary, a research institute with EMFAF support, in
level	cooperation with a local fishing fleet develops a new trawl
	monitoring system in hopes of reducing harm to local fauna. The
	local fishers adopt the system.
	The beneficiary reports one innovation enabled.

CR15	Control means installed or improved
Indicator name	Control means installed or improved
Measurement unit	Number of means
Definition	Number of new control means installed, as specified in the EMFAF
	regulation Article 22.2.a, b and c
Further clarification	<ul> <li>this CR aims specifically at the results of Article 22.2.a, b and c equipment installed to meet the legal requirements, though equipment providing more than the legal requirement is also eligible.</li> <li>the CR counts the <i>number of installed or improved means</i>, not the type of instrument.</li> <li>these include, according to the regulation, "the purchase, installation and management on vessels of the necessary components and devices for:         <ul> <li>compulsory vessel tracking and electronic reporting systems used for control purposes</li> <li>compulsory remote electronic monitoring systems used for controlling the implementation of the landing obligation compulsory continuous measurement and recording of propulsive engine power"</li> </ul> </li> <li>for land-locked countries this CR can be used also to include electronic tracking and reporting systems used for control purposes</li> </ul>
	on land
Further clarification direct	n/a
management	
Programme level	
Clarification	<ul> <li>in the programme the indicator is the number of control means installed following EMFAF support</li> </ul>
Baseline value	• the baseline value in the programme is zero
Target values	<ul> <li>estimation of target values could be based on expert knowledge, statistics, monitoring data, surveys and experience from the programming period 2014-2020</li> <li>the target value achievements will be calculated based on the sum of results achieved at operational level</li> <li>the target values may be close to estimated output values</li> </ul>
On anotion land	the target values may be close to estimated output values
Operation level Inputs from the beneficiary	number of means installed
inputs from the beneficiary	
Innuts from other sources	• FFR number (if installed on board a vessel)
Inputs from the MA/Input	n/a
Inputs from the MA/ Input	• number of control means installed, as supported under
from contracting authority	Article 22.2.a, b and c
(direct management) Reference period for the	a duration of the operation
single operation	duration of the operation
Baseline for the single operation	• the baseline value is zero
Target value	ex-ante assumption of the target value
Achieved value	number of new control means installed at completion of the operation
Example at the operation	A vessel owner buys and installs new VMS and ERS on their vessel.

CR15	Control means installed or improved
level	The beneficiary would report a value of two, as he installs two
	different control means, as well as the FFR number of the vessel.

CR16	Entities benefiting from promotion and information activities
Indicator name	Entities benefiting from promotion and information activities
Measurement unit	Number of entities
Definition	<ul> <li>number of entities (e.g. fisheries/processing companies, NGOs) as well as companies of any kind that are not grant beneficiaries but which benefit directly from promotion- and information-related operations implemented by the grant beneficiary</li> <li>differs from "persons benefitting" in that it does not include any individual persons unless they are sole operators</li> </ul>
Further clarification	<ul> <li>for example, if a regional authority or a PO participates in trade fairs, market promotion activities etc., the fishers (as a business entity) of the region or the members of the PO are represented and thus benefit directly; the same applies to any fish processing companies or retailers who benefit</li> <li>this indicator is not about the number of companies or people who visit the trade fair or the pavilion of the beneficiary</li> <li>entities include businesses, FLAGs, NGOs, POs, etc.</li> </ul>
Further clarification direct	• for events, this should be those exhibiting, pitching and promoting
management	their activities – not those attending
	<ul> <li>for direct management it covers only private entities</li> </ul>
	• for direct management it should not include closed workshops
Programme level	
Clarification	• in the programme the indicator is the number of business entities benefiting from promotion and information activities following EMFAF support
Baseline value	the baseline value in the programme is zero
Target values	<ul> <li>target values should be defined separately for each specific objective</li> <li>estimation of target values could be based on surveys and experience from the programming period 2014-2020</li> <li>the target value achievements will be calculated based on the sum of results achieved at operational level</li> <li>the target value might be based on beneficiary surveys</li> </ul>
Operation level	
Inputs from the beneficiary	<ul> <li>entities benefiting from promotion and information activities (e.g. participants on a stand at a fair, or in an information event)</li> <li>the result indicator value should be as close as possible to the unit or location implementing the operation</li> <li>double counting can occur easily and should be avoided where possible</li> </ul>
Inputs from other sources	n/a
Inputs from the MA/ Input from contracting authority (direct management)	n/a
Reference period for the	duration of the operation

CR16	Entities benefiting from promotion and information activities
single operation	
Baseline for the single	• the baseline value is zero
operation	
Target value	<ul> <li>ex-ante assumption of the target value</li> </ul>
	• target values estimated ex-ante should be chosen based on realistic
	assumptions
Achieved value	<ul> <li>entities benefiting from promotion and information activities at</li> </ul>
	completion of the operation
Example at the operation	The beneficiary, a regional maritime affairs and fisheries authority,
level	decides to host a community trade fair, using EMFAF funding, for
	local businesses in the fisheries and aquaculture sector to advertise
	their products. A total of 20 local businesses participate with a stand
	or a pavilion. Approximately 2000 visitors attend.
	The beneficiary reports 20 entities benefiting from promotion and
	information activities. The number of visitors is irrelevant.

CR17	Entities improving resource efficiency in production and/or
	processing
Indicator name	Entities improving resource efficiency in production and/or
	processing
Measurement unit	Number of entities
Definition	Number of sole operators or companies introducing resource-saving
	technologies and processes including conversion to renewable
	energy or increasing efficiency through reduced water use,
	insulation, or reuse of material previously considered waste.
Further clarification	Examples are:
	<ul> <li>reducing or avoiding discharges</li> </ul>
	• reduction of water use
	reducing water pollution
	<ul> <li>increasing efficiency in water consumption through recirculation</li> </ul>
	systems or multi-trophic aquaculture
	<ul> <li>reduction of energy use and transfer to renewable energy sources</li> </ul>
	reduction of energy use and transfer to renewable energy sources     reduction of food waste
	multi-use platforms
	• demonstrators or prototypes
	Entities include businesses, FLAGs, NGOs and POs.
Further clarification direct	As for shared management
management	
Programme level	
Clarification	• in the programme the indicator is the number of entities improving
	resource efficiency in production and/or processing following
	EMFAF support
Baseline value	the baseline value in the programme should be zero
Target values	• target values should be defined separately for each specific
-	objective
	<ul> <li>estimation of target values could be based on surveys and</li> </ul>
	experience from the programming period 2014-2020

CR17	Entities improving resource efficiency in production and/or processing
	the target value achievements will be calculated based on the sum of results achieved at operational level
Operation level	
Inputs from the beneficiary	<ul> <li>number of entities improving resource efficiency in production and/or processing</li> <li>the result indicator value should be as close as possible to the unit or location implementing the operation</li> </ul>
Inputs from other sources	n/a
Inputs from the MA/ Input from contracting authority (direct management)	n/a
Reference period for the single operation	duration of the operation
Baseline for the single operation	the baseline value is zero
Target value	ex-ante assumption of the target value
Achieved value	<ul> <li>entities improving resource efficiency in production and/or processing at the time of completion of the operation</li> </ul>
Example at the operation level	An aquaculture plant installs solar cells to cover its energy needs. To provide data for this indicator, the beneficiary would report the number of entities, which in this case is one as only the aquaculture plant is an EMFAF beneficiary.

CR18.1/CR18.2	Energy consumption leading to CO ₂ emissions reduction
Indicator name	Energy consumption (on board a vessel/aquaculture/
	processing) leading to CO ₂ emissions reduction (litres/h)
	Energy consumption (on board a vessel/aquaculture/
	processing) leading to CO ₂ emissions reduction (kWh/tonne)
Measurement unit	18.1: kWh per tonne
	18.2: litres/h
Definition	Engine modernisation and replacements, and other measures to
	reduce fuel consumption. CO ₂ emissions are estimated based on the
	characteristics of the engine:
	• 18.1: energy consumption of an aquaculture or processing
	enterprise, expressed in kWh per tonne of produce 18.2: energy
	consumption of new or modernised engines in fishing vessels
	(expressed in litres of fuel per hour of operation according to the
	specification of the manufacturer)
Further clarification	• 18.1: the indicator is a combination of energy consumption and
	fish production
	• 18.2: the indicator measures only theoretical consumption
	<ul> <li>sector and type of investment are defined in Infosys</li> </ul>
	• the CO ₂ emissions reduction will be calculated by DG MARE
	(methodology for this will be addressed in a forthcoming
	FAMENET working paper)
Further clarification direct	n/a
management	
Programme level	

CR18.1/CR18.2	Energy consumption leading to CO ₂ emissions reduction
Clarification	• 18.1: in the programme the indicator should express the average
	change in energy consumption in kWh per tonne (i.e. sum of all
	changes divided by the number of operations) following EMFAF
	support
	• 18.2: in the programme the indicator should express the average
	change in energy consumption (i.e. sum of all changes divided by
	the number of operations) in litres/h following EMFAF support
Baseline value	• the baseline value in the programme is zero.
Target values	target values should be defined separately for each specific     objective
	objective
	estimation of target values could be based on surveys and
	<ul> <li>experience from the programming period 2014-2020</li> <li>the target value achievements will be calculated based on the</li> </ul>
	• the target value achievements will be calculated based on the average of the total results achieved at operational level minus the
	average baseline value at operational level
Operation level	average baseline value at operational level
Inputs from the beneficiary	• 18.1: calculation based on (a) energy consumption before and after
inputs from the beneficiary	• 18.1: calculation based on (a) energy consumption before and after the operation AND (b) volume of production before and after the
	operation (a/b)
	• for cases where no exact numbers are available, estimates based on
	the energy specifications of the equipment can be used
	• the result indicator value should be as close as possible to the unit
	or location implementing the operation
	• 18.2: calculation based on energy consumption in litre/h before and
	after the operation
	• standardised values based on the energy specifications of the
	equipment can be used
	• the result indicator value should be as close as possible to the unit
	or location implementing the operation
Inputs from other sources	• 18.2 fuel consumption per hour on board of a vessel as per
	technical specifications of the engine manufacturer
Inputs from the MA/ Input	n/a
from contracting authority	
(direct management)	
Reference period for the	duration of the operation
single operation	1011777
Baseline for the single	• 18.1: kWh per tonne energy consumption <b>before</b> the operation
operation	• 18.2: litres/h per engine before investment
Target value	ex-ante assumption of the target value
Achieved value	• 18.1: kWh per tonne energy consumption at completion, or up to a
	certain number of years after completion of the operation 18.2:
Evennle et the execution	litres/h (new or modernised engine) at completion of the operation
Example at the operation	A fishing company upgrades its vessels with more fuel-efficient
level	engines using EMFAF funding. To provide a reliable indicator for the effectiveness of this operation, the beneficiaries decide to choose
	CR18.2: "Energy consumption leading to CO ₂ emissions reduction
	litres/h". To provide data for this indicator, the company would need
	to report data on the litres/h per engine of its vessels before the
	EMFAF investment, as well as the litres/h per engine of the new or
	2 I mresument, as men as the nures in per engine of the new of

CR18.1/CR18.2	Energy consumption leading to CO ₂ emissions reduction
	modernised engines at completion of the operation. The values can
	be based on the engine manufacturers' specifications.

CR19	Actions to improve governance capacity		
Indicator name	Actions to improve governance capacity		
Measurement unit	Number of actions		
Definition	Actions can be any planned and systematic activities increasing institutional capacity and governance for example related to training, joint exercises, operational support, IT systems, investment in other equipment and hardware etc.		
Further clarification	<ul> <li>for shared management it applies to actions related to the support of control agencies or other relevant entities such as hardware investments (installation of IT infrastructure, helicopters, patrol vessels, etc.), software investments (IT programmes, communication and information protocols etc.), and human resources capacity building; the specific purpose should be indicated in the project description in Infosys</li> <li>for shared management it also applies to actions related to the FLAG operation that aim to increase institutional capacity and governance (for example animation, participation, local strategy development actions, etc.) at the local level, going beyond the FLAG operation alone</li> </ul>		
Further clarification direct	• for direct management this includes actions for enforcement,		
management	coastguards or maritime surveillance		
	• for direct management it applies also to actions related to the support of institutions such advisory councils, RFMOs, United Nations agencies, the COM and the MS (FAMENET)		
Programme level			
Clarification	<ul> <li>in the programme for control and enforcement, the indicator is the number of actions addressing control agency institutional capacity and governance with EMFAF support</li> <li>in the programme for FLAGs the indicator is the number of outreach actions of the FLAG</li> </ul>		
Baseline value	• the baseline value in the programme is zero		
Target values	<ul> <li>target values should be defined separately for each specific objective</li> <li>estimation of target values could be based on monitoring data, surveys and experience from the programming period 2014-2020</li> <li>the target value achievements will be calculated based on the sum of results achieved at operational level</li> <li>the target values may be close to estimated output values</li> </ul>		
Operation level			
Inputs from the beneficiary	<ul> <li>number of actions</li> <li>This indicator can be combined with other result indicators at the operation level, for example persons benefitting.</li> </ul>		
Inputs from other sources	n/a		
Inputs from the MA/ Input	n/a		
from contracting authority			

CR19	Actions to improve governance capacity	
(direct management)		
Reference period for the single operation	duration of the operation	
Baseline for the single operation	• the baseline value is zero	
Target value	• ex-ante assumption of the target value	
	• target values estimated ex-ante should be chosen based on realistic assumptions	
Achieved value	• number of actions implemented at the completion of the operation	
Example at the operation	The control agency implements an operation including i) patrol	
level	vessels procurement and ii) enhancement of the interoperability with	
	other agencies. The beneficiary reports 2 actions.	

CR20	Investment induced		
Indicator name	Investment induced		
Measurement unit	EUR		
Definition Definition	Investment induced after the operation as a direct consequence of an		
Bermusi	operation's enabling actions, for example:		
	<ul> <li>when an operation provides potential investors with feasibility</li> </ul>		
	studies, cost benefit analyses etc.		
	• when a grant or financial instrument or assistance to the		
	beneficiary increases investment suitability		
	Investment can be financed thought private or public funds.		
Further clarification (e.g.	not private co-financing of the EMFAF project per se		
possible exceptions)			
Further clarification direct	• for direct management this does not include investment in		
management	companies benefiting from publicly available products		
Programme level			
Clarification	<ul> <li>in the programme the indicator is the number of investments induced following EMFAF support</li> </ul>		
Baseline value	• the baseline value in the programme is zero		
Target values	estimation of target values could be based on expert knowledge, statistics, monitoring data, surveys and experience from the programming period 2014-2020		
	<ul> <li>the target value achievements will be calculated based on the sum of results achieved at operational level</li> </ul>		
	• the target values may be close to estimated output values		
Operation level			
Inputs from the beneficiary	<ul> <li>total amount for concrete investment plans either started or defined in a binding agreement after the operation</li> <li>This indicator can be combined with other result indicators at the operation level, for example innovations enabled.</li> </ul>		
Inputs from other sources	n/a		
Inputs from the MA/ Input from contracting authority (direct management)	n/a		
Reference period for the single operation	• duration of the operation and up to two years after completion of the operation		

CR20	Investment induced
Baseline for the single	• zero
operation	
Target value	• ex-ante assumption of the target value
Achieved value	• investment induced up to two years after completion of the
	operation
Example at the operation	A research institute develops an innovative product for which
level	market demand exists. When the operation is in the phase of
	finalisation an investor steps-in and agrees to invest EUR 1 million
	to bring the innovation to the market. This is sealed with an
	agreement. The beneficiary reports EUR 1 million as investment
	induced.

CR21	Datasets and advice made available		
Indicator name	Datasets and advice made available		
Measurement unit	Number		
Definition	<ul> <li>datasets made available in a "ready to use" form via a website or a similar data depository. Such datasets should comply with state-of-the-art quality criteria, include metadata, and be in a non-proprietary format.</li> <li>advice made available in a coherent, final and "standalone" form responding to a request to an institution (e.g. RFMO, advisory councils).</li> <li>market intelligence (studies/reports/monthly highlights).</li> </ul>		
Further clarification (e.g.	<ul> <li>can include scientific/ professional publications.</li> <li>The indicator excludes ad-hoc responses and incremental</li> </ul>		
possible exceptions)	improvements/modifications of existing elements		
Further clarification direct	For direct management only the number of sets of advice and		
management	intelligence is measured – not the data itself		
Programme level	monigone is measured. Not the dama tools		
Clarification	<ul> <li>in the programme the indicator is the number of datasets and sets of advice and intelligence made available following EMFAF support</li> </ul>		
Baseline value	• the baseline value in the programme is zero		
Target values	<ul> <li>estimation of target values could be based on expert knowledge, statistics, surveys and experience</li> <li>the target value achievements will be calculated based on the sum of results achieved at operational level</li> <li>the target values may be close to estimated output values</li> </ul>		
Operation level			
Inputs from the beneficiary	• total number of reports and advice made available based on internal reporting and recording systems		
Inputs from other sources	n/a		
Inputs from the MA/ Input from contracting authority (direct management)  Reference period for the single operation	n/a  • duration of the operation		
Baseline for the single operation	• zero		

CR21	Datasets and advice made available	
Target value	• ex-ante assumption of the target value	
Achieved value	total number of datasets	
Example at the operation level	A MS government develops with EMFAF support an online platform with an open-source database of maritime and fisheries statistics. The data are provided in three packages depending on the fisheries type in the MS and can be downloaded by interested parties.  The beneficiary reports three datasets made available on the online platform during the duration of the operation.	

CR22	Usage of data and information platforms	
Indicator name	Usage of data tools	
Measurement unit	Number of page views	
Definition	• number of unique page views over the course of the project	
Further clarification (e.g.	• number of unique views counted by visitor counting system of a	
possible exceptions)	platform	
	<ul> <li>number of unique views by users registered on a restricted database platform</li> </ul>	
Further clarification direct	As for shared management	
management		
programme level		
Clarification	• in the programme the indicator is the number of views of a	
	database or information platform made available following EMFF support	
Baseline value	the baseline value in the programme is zero	
Target values	<ul> <li>estimation of target values could be based on expert knowledge,</li> </ul>	
	statistics, surveys and experience	
	• the target value achievements will be calculated based on the sum	
	of results achieved at operational level	
	• the target values may be close to estimated output values	
Operation level		
Inputs from the beneficiary	• number of views in total during the operation	
Inputs from other sources	<ul> <li>platform's own metrics (e.g. Google Analytics)</li> </ul>	
Inputs from the MA/ Input	n/a	
from contracting authority		
(direct management)		
Reference period for the	duration of the operation	
single operation		
Baseline for the single	• zero	
operation Target value	a cy onto accumption of the torget value	
Achieved value	ex-ante assumption of the target value      pumber of views over the course of the project.	
	number of views over the course of the project  A MS covernment develops with EMEAE support on online	
Example at the operation level	A MS government develops with EMFAF support an online platform with an open-source database of maritime and fisheries	
ic vei	statistics.	
	The beneficiary provides the number of unique views on the	
	platform during the duration of the operation using the respective	
	platform's own metrics provisions.	

## 3.3.3 Core performance indicators

Core performance indicators	Common result indicators/Infosys		
CI 01 - Businesses created	CR03 - Businesses created (number of		
GY 02 P :	entities)		
CI 02 - Businesses with higher	CR04 - Businesses with higher turnover		
turnover	(number of entities)		
CI 03 - Jobs created	CR06 - Jobs created (number of persons)		
CI 04 - Jobs maintained	CR07 - Jobs maintained (number of		
	persons)		
CI 05 - Persons benefitting	CR08 - Persons benefitting (number of		
	persons)		
CI 06 - Actions contributing to a good	CR10 - Actions contributing to a good		
environmental status, including nature	environmental status, including nature		
restoration, conservation, protection of	restoration, conservation, protection of		
ecosystems, biodiversity, animal health	ecosystems, biodiversity, animal health and		
and welfare	welfare (number of actions)		
CI 07 - Energy consumption	CR18 - Energy consumption leading to		
leading to CO2 emissions	CO2 emissions reduction (kWh/tonnes or		
reduction	litres/h)		
CI 08 - Number of SMEs supported	Infosys: Extract data from field 10		
	(beneficiary) where the code is 04 (Private		
	enterprise - Micro) and 05 (Private		
	enterprise – SME)		
CI 09 - Number of fishing vessels	Infosys: Extract data from field 37 (result		
equipped with electronic position and	indicator) where the code is CR 15 (Control		
catch reporting devices	means installed or improved), and for		
	operations where field 04 has a value		
	(Common Fleet Register Number (CFR)).		
	Once duplicates are removed the total		
	number of fishing vessels with control means installed can be reported.		
CI 10 Number of legal action groups	-		
CI 10 - Number of local action groups	The Commission will have to contact the MS to obtain this information.		
CI 11 - Number of small scale coastal			
fishing vessels supported	Infosys: Extract CFR numbers from field 4 and combine them with the length and the		
namig vessels supported	gear from the EU Fleet Register.		
CI 12 - Usage of data and information	CR22 - Usage of data and information		
platforms	platforms (number of page views)		
Piatroffilis	platforms (number of page views)		

#### 3.4 Infosys structure as per Infosys Implementing Regulation 2022/79

This annex contains the two Infosys annexes and their respective tables from the Implementing Regulation. In some cases, additional information and descriptions complement the annexes and tables. Descriptions and information, which are not necessarily included in the Implementing Regulation itself, such as for instance the column with the links to Annex VII of the CPR

#### 3.4.1 Infosys, Annex I, Table 1, Operation description

Infosy	Infosys CIR content			
No.	Content of fields 2021-2027	Description	Link with Annex VII of CPR	
01	CCI	Common code of identification of the programme.		
		Not applicable for direct and indirect management.		
	TT :		Table 1, field 13.	
02	Unique identifier of the operation (ID)	Required for all operations supported by the EMFAF.	Table 4, field 6.	
			Table 5, fields 11 and 12.	
0.2	Description of the operation	An overall description of the operation should be provided in 255		
03		characters summing up the most important aspects of the		
		operation. ¹⁵		
	Common fleet register (CFR) number	Where relevant		
		Common fleet register (CFR) number as per Commission		
		Implementing Regulation (EU) 2017/218		
04		· one vessel per operation: CFR number (the standard case)		
		· more than one vessel per operation: CFR numbers as CSV		
		(Comma-Separated Values)		
		Semicolon ";" shall be used as separator.		
		No blanks, no quotation marks.		

¹⁵ FAMENET would like to emphasise the importance of providing detailed operation descriptions as it allows for a standardised approach across all MS, while facilitating the reporting to the Commission on very specific topics.

Infosys CIR content			
No.	Content of fields 2021-2027	Description	Link with Annex VII of CPR
05	Sector the operation is contributing to	See code in Table 1 of Annex II of the Implementing Regulation. Only one option can be selected.	
06	Specific objective	For shared management: see nomenclature in Annex II of the EMFAF Regulation.  For direct and indirect management: see nomenclature in the work programme adopted pursuant to Article 10 of the EMFAF Regulation.	
07	NUTS code	Only NUTS versions valid during the programming period, i.e. NUTS Classification 2021 or later. See Commission Delegated Regulation 2019/1755 of 8 August 2019 or https://ec.europa.eu/eurostat/web/nuts/background.  No spaces. NUTS 3 by default, NUTS 2 to national level as appropriate if the operation relates to a larger region or the whole Member State.  "TCX1" for operations in third countries or operations of Advisory Councils.	
08	Name of beneficiary	Name of the beneficiary (be aware of the General Data Protection Regulation (GDPR), Regulation (EU) 2016/679)	
09	Beneficiary code	Unique code.  For shared management: based on the national application system.	
10	Type of beneficiary ¹⁶	See code in Table 2 of Annex II of the Implementing Regulation. Only one option can be selected	

¹⁶ The lead beneficiary, if an operation has more than one beneficiary

Infosy	Infosys CIR content		
No.	Content of fields 2021-2027	Description	Link with Annex VII of CPR
11	Gender of beneficiary/natural person	See code in Table 3 of Annex II of the Implementing Regulation. Only one option can be selected.	
12	Number of people directly involved in the operation	Excludes contractors and people/employees not directly participating in the operation.	
13	Number of partners involved in the operation	"Partners" are entities financially vested in the operation being funded. Either being grant beneficiaries or directly involved in any other way. Affiliated or interested entities, for example participating at an event, and not directly involved are not partners.  For cases where this field is irrelevant, it is possible to enter a value of 0.	
14	Lead partner	See code in Table 4 of Annex II of the Implementing Regulation.  This field indicates whether or not the beneficiary of the funded project is the lead partner.  A lead partner is the entity in a partnership that "takes full financial and legal responsibility for the implementation of the entire operation."	
15	Indication as to whether the operation relates to marine, inland, or both	See code in Table 5 of Annex II of the Implementing Regulation.	

Infosy	Infosys CIR content			
No.	Content of fields 2021-2027	Description	Link with Annex VII of CPR	
16	State of progress of the operation	See code in Table 6 of Annex II of the Implementing Regulation.	Table 1, field 13. Table 4, field 6. Table 5, fields 11 and 12. Table 9, fields 11, 12, 13 and 14.	
17	Total eligible cost (EUR)	No currency sign. Amount of the total eligible cost of the operation approved in the document setting out the conditions for support (EMFAF, private, national public).		
18	Total eligible public cost (EUR)	No currency sign. Amount of the total eligible costs constituting public expenditure (EMFAF, national public).	Table 1, field 8. Table 4, field 4.	
19	EMFAF support (EUR)	No currency sign. Amount of EMFAF support, as set out in the document setting out the conditions for support.	Table 1, field 9.	
20	Date of approval of application for support	Date of the document setting out the conditions for support.		
21	Total eligible expenditure (EUR)	No currency sign. Actual total eligible expenditure, total (EMFAF, private, national public), declared by the beneficiary to the Managing Authority in payment claim(s).		
22	Total eligible public expenditure (EUR)	No currency sign. Actual total eligible expenditure, public (EMFAF, national public) corresponding to the eligible expenditure declared by the beneficiary to the Managing Authority in payment claim(s).	Table 1, field 11. Table 4, field 5.	

Infosys CIR content			
No.	Content of fields 2021-2027	Description	Link with Annex VII of CPR
23	EMFAF eligible expenditure (EUR)	No currency sign. Actual total eligible expenditure (EMFAF) corresponding to the eligible expenditure declared by the beneficiary to the Managing Authority in payment claim(s).	
24	Date of final payment to beneficiary	dd/mm/yyyy	
25	Type of intervention	For shared management: see codes in Annex IV of the EMFAF Regulation.  For direct and indirect management: see codes in Table 9 of Annex II of the Implementing regulation.	Table 4, field 3.
26	Type of operation	See code in Table 7 of Annex II of the Implementing Regulation.	
27	Increase of the gross tonnage of a fishing vessel under Article 19(3) of the EMFAF Regulation	Amount of additional GT. Blank in case operation not related to Article [19(3)]. Inserting a value in this field indicates an operation under Article 19(3). In this case the selected type of operation in field 26 should refer to Article 19(3)	
28	Description of the fleet segment relevant to field 27	If relevant, description of the fleet segment(s) of origin of the gross tonnage allocated to the vessel benefitting from the operation as presented in the annual report foreseen under Article 22(2) of Regulation (EU) No 1380/2013 of the European Parliament and of the Council, in line with Commission guidelines COM(2014)545.	
29	Operation relevant to small-scale coastal fishing (SSCF)	Only 01 or 02 allowed. See code in Table 4 of Annex II of the Implementing Regulation.	

Infosy	Infosys CIR content			
No.	Content of fields 2021-2027	Description	Link with Annex VII of CPR	
30	Operation relevant to the landing obligation	Only 01 or 02 allowed. See code in Table 4 of Annex II of the Implementing Regulation.		
31	Operation relevant to climate change	Only 01 or 02 allowed. See code in Table 4 of Annex II of the Implementing Regulation.		
32	Operation relevant to non-discrimination	Only 01 or 02 allowed. See code in Table 4 of Annex II of the Implementing Regulation.		
33	Operation relevant to gender equality	Only 01 or 02 allowed. See code in Table 4 of Annex II of the Implementing Regulation.		
34	Operation relevant to rights of people with disabilities	Only 01 or 02 allowed. See code in Table 4 of Annex II of the Implementing Regulation.		
35	Form of support	See code in Table 8 of Annex II of the Implementing Regulation. Only one option can be selected.	Data field 2 of Table 2 of Annex VII to CPR	
36	Did the beneficiary previously receive EMFF/EMFAF support?	Only 01 or 02 allowed. See code in Table 4 of Annex II of the Implementing Regulation.		

### 3.4.2 Infosys, Annex I, Table 2, Indicators applicable to the operation

Infosys CIR content			
No.	Content of fields 2021-2027	Description	Link with Annex VII of CPR
01	CCI	Link to field 01 of Infosys Annex 1, Table 1 (key attribute) of the	
		Implementing Regulation.	
02	Unique identifier of the operation (ID)	Link to field 02 of Infosys, Annex 1, Table 1 (key attribute) of the	Table 1, field 13.
		Implementing Regulation	Table 4, field 6.
			Table 5, fields 11 and 12.

Infosy	Infosys CIR content			
No.	Content of fields 2021-2027	Description	Link with Annex VII of CPR	
37	Common result indicator(s) code(s) applicable to the operation (as many rows as relevant)	See codes in Table 10 of Annex II of the Implementing Regulation.  One row per indicator.	Table 9, field 5.	
38	Baseline value	<ul> <li>Value before the operation (one row per indicator).</li> <li>Value in most cases is zero. Except for:</li> <li>CR01 - New production capacity, where baseline is production capacity before the operation</li> <li>CR12 - Effectiveness of the system for "collection, management and use of data", where baseline value cannot be lower than 1;</li> <li>CR18.1 Energy consumption leading to CO2 emissions reduction (kWh/tonnes), where baseline value is energy need per tonne of produce and year BEFORE the operation.</li> <li>CR18.2 Energy consumption leading to CO2 emissions reduction (litres/hour), where baseline value is consumption per hour BEFORE the operation</li> </ul>	Table 9, fields 11 and 12.	
39	Indicative result expected by the beneficiary (one row per indicator)	Ex-ante estimation of the value to be achieved after the operation.  Value may be the same as baseline - this means no change to the status quo.	Table 9, field 12.	
40	Ex-post result (one row per indicator)	The resulting value after the project has been completed.	Table 9, field 14.	

# 3.4.3 Annex II of the Implementing Regulation, Presentation of implementation data, Tables 1-10

Annex II of the Implementing Regulation contains ten tables with the codes and the information needed to fill out Annex I, Tables 1 and 2. Below, the tables are replicated with additional information where it is deemed necessary.

Table 1: Sector the operation is contributing to (Annex I, table 1, field 5)

Code	Description
01	Fisheries
02	Aquaculture
03	Processing
04	Tourism
05	Environment
06	Maritime (except fishing and aquaculture)
07	Integrated/multisector
08	Other

Table 2: Type of beneficiary (1) (Annex I, Table 1, field 10)

	Description		
Code	Description		
01	PO – Producer organisation		
02	APO – Association of producer organisations		
03	IBO – Inter-branch organisation		
04	Private enterprise – micro		
05	Private enterprise – SME (Small or medium-sized enterprise)		
06	Private enterprise – large		
07	Public body		
08	Research centre / university / scientists		
09	Non-governmental organisation (NGO) / association		
10	Educational institution		
11	LAG – Local action group		
12	Entity without legal personality		
13	International organisation		
14	Commission bodies and agencies		
15	Natural persons		
16	Other		
(1) Th	(1) The lead partner, if an operation has more than one beneficiary		

Table 3: Gender of beneficiary/natural person (Annex I, Table 1, field 11)

Code	Description
01	Natural person – male
02	Natural person – female
03	Natural person – non-defined gender
04	More than one natural person, family
05	More than one natural person, predominately male
06	More than one natural person, predominately female
07	N/A. (in the case of legal persons)

Table 4: Codes for Yes/No fields (Annex I, Table 1, fields 29-34 and 36)

Code	Description
01	Yes
02	No

Table 5: Indication as to whether the operation relates to marine, inland, or both (Annex I, Table 1, field 15)

	- , , ,		
Code	Description		
01	Marine		
02	Inland		
03	Both		
04	N/A		

Table 6: State of progress of the operation (Annex I, Table 1, field 16)

Code	Description
01	Operation selected
02	Operation interrupted/abandoned following partial implementation
03	Operation fully implemented (but for which all expenses have not necessarily been paid to the beneficiary)
04	Operation completed

Table 7: Type of operation (Annex I, Table 1, field 26)

Code	Description (type of operation)	Further definition
01	Investment in reduction of energy	Operations related to reductions in energy demand
	use and energy efficiency	and increases in energy-use efficiency.
		Examples include:
		<ul> <li>converting/modernising to more fuel-efficient vessel main or ancillary engines or replacing them (FFR number required in the respective Infosys field and the selection of the CR18.1)</li> <li>gear modifications to reduce fuel use</li> <li>onshore operations</li> <li>provision of electricity to vessels in ports</li> </ul>

Code	Description (type of operation)	Further definition
	2 csemption (c) pe of operation)	<ul> <li>improved insulation for refrigeration systems</li> <li>use of heated water from adjacent industrial sources (e.g. power plants)</li> <li>improved thermal insulation of processing areas or other measures to avoid temperature fluctuations</li> <li>shifting to local suppliers, leading to reductions in food miles</li> <li>purchasing more energy-efficient production technology</li> <li>In case the installation or renovation of energy efficiency leads to an increase of GT according to EMFAF Article 19(3), the GT increase needs to be reported in field 27 of Infosys.</li> </ul>
02	Investment in renewable energy systems	Operations related to the transition to more renewable energy sources.  Examples include:  installation of renewable energy systems (solar panels, wind turbines)  shifting to renewable energy systems  use of renewable energy by businesses or other entities in the FLAG area
03	Investment in on-board production equipment	Operations related to the acquisition of efficiency- improving and sustainability-increasing physical items, used on board fishing vessels for production activities, which are considered investment costs related to production.  Examples include:  • replacement or modernisation of on-board production equipment such as cool storage facilities  Ensure that the operation is not more relevant to other types of operations, for example:  • 01 Investment in reduction of energy use and energy efficiency  • 02 Investment in renewable energy systems  • 04 Investment on board to improve navigation or engine control  • 33 Gear selectivity to reduce unwanted catches  • 34 Gear modification to minimise habitat impacts  • 35 Gear selectivity in relation to endangered, threatened and protected species  • 54 Investments in safety equipment  • 55 Investments in working conditions
04	Investment on board to improve navigation or engine control	Operations related to investment in integrated bridge systems to improve navigation or engine

Code	Description (type of operation)	Further definition
		control.
		In case the operation leads to an increase of GT
		according to EMFAF Article 19 (3), the amount of
		GT increased needs to be reported in field 27 of
		Infosys.
05	Investment in physical infrastructure	Operations related to investment in physical
	at existing fishing ports or at new or	infrastructure at existing fishing ports or at new or
	existing landing sites	existing landing sites.
		Examples include:
		implementing the landing obligation
		developments in the blue economy
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		• 54 Investments in safety equipment
		55 Investments in working conditions
06	First acquisition of a fishing vessel	Operations related to the first acquisition of a
		fishing vessel by a young fisher who, at the time
		of submitting the application, is under 40 years of
		age and has worked at least five years as a fisher
		or has acquired adequate vocational qualification
		in accordance with EMFAF, Article 17
07	Investment to improve traceability	Operations related to the traceability of fish from
		point of capture to retail.
		Examples include:
		IT systems related to development of
		traceability
00	D 1: 1 C	use of barcodes, scanners, etc.
08	Preparation and implementation of	Operations related strictly to the design and execution of production and marketing plans
	production and marketing plans by	
	producer organisations	(PMPs) by producer organisations.
		Ensure that the operation is not more relevant to
		other types of operations, for example:
09	Markating activities	OMarketing activities     Operations related to strengthening the
09	Marketing activities	competitiveness of the Union fishery and
		aquaculture industry; improving the transparency
		and stability of the markets, particularly in regard
		to economic knowledge and understanding of the
		Union markets for fishery and aquaculture
		products along the supply chain; ensuring that the
		distribution of added value along the sector's
		supply chain is more balanced; and improving
		consumer information and raising consumer
		awareness, for the purpose of increasing sales, by
	1	purpose of moreabing bales, by

Code	Description (type of operation)	Further definition
		means of notification and labelling.
		Examples include:
		promotional campaigns and branding
		eco-label certification
		promoting sales
		measures under Articles 8 and 15 of Regulation (EU) No 1379/2013 (related to the activities of producer organisations)
		• short circuits (e.g. direct sales) for fisheries products
		• improving the image of fisheries
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		08 Preparation and implementation of production and marketing plans by producer organisations
		• 11 Investments to support business development (strategy development,
		<ul><li>administration, equipment)</li><li>12 Other business-diversification operations not</li></ul>
		involving fisheries, aquaculture, or innovation
		16 Awareness raising, communication to the wider public
		18 Development of marketing innovation
		20 Development of product innovation
10	Advisory services	Operations related to specialised technical advice
		given to operators in the relevant sectors and
		delivered by external experts, either during the
		implementation phase or once a business is
		already running.
		Examples include:
		advice on technological solutions for
		environmental conservation
		• feasibility studies for aquaculture, processing,
		or market developments
		• introduction of quality management systems (QMS, ISO)
11	Investments to support business	Operations related to existing businesses and the
	development (strategy development,	creation of new businesses in the relevant sectors.
	administration, equipment)	Under direct management this may include
		additional investments delivered through
		investment funds, for example through the
		BlueInvest Initiative. This does not include
		support to company through an intermediary.
		Examples include:
		business planning strategies
		start-up registrations

Code	Description (type of operation)	Further definition
		business development strategies
		equipment to enhance local businesses
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		08 Preparation and implementation of
		production and marketing plans by producer
		organisations
		09 Marketing activities
		• 10 Advisory services
		• 12 Other business-diversification operations not
		involving fisheries, aquaculture, or innovation
		• 18 Development of marketing innovation
12	Other business diversification	20 Development of product innovation  Operations related to the action plan for small.
12	Other business-diversification	Operations related to the action plan for small-scale fisheries and diversification of activities in
	operations not involving fisheries,	
	aquaculture, or innovation	the broader sustainable blue economy.
		Operations could be those that serve to enhance
		and access opportunities and income offered by
		the sustainable blue economy, and the potential
		for fishers to engage in new types of non-fishery-
		related activities in addition to, or in place of,
		fishery-related activities.
		In the case of CLLD, diversification can also refer
		to activities outside of fisheries, including by non-
		fishers, which serve to diversify the local
		economy as outlined in the respective Local
		Development Strategy.
		Examples include:
		tourism activities, including pesca-tourism
		• trade
		new business development outside the fisheries
		sector • recycling
		<ul><li>recycling</li><li>products or services developed outside fisheries</li></ul>
		and which do not involve innovation
		renewable energy
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		Preparation and implementation of production
		and marketing plans by producer organisations
		Marketing activities
		Advisory services
		Investments to support business development
		(strategy development, administration,
		equipment)
		Development of marketing innovation

Code	Description (type of operation)	Further definition
		Other (economic)Other (economic)
13	Insurance schemes	Operations related to aquaculture stock insurance
		schemes.
		Examples include:
		• mutual insurance schemes set up by operators to cover damage by natural disasters or diseases
14	Training to improve skills and	Operations related to <i>the transfer of skills and/or</i>
14	develop human capital	knowledge to individuals, with the aim of
	de verop numum cupitur	strengthening the capability, human capital,
		productivity, and performance of trainees.
		Examples include:
		<ul> <li>individual seminars, workshops, meetings etc. directed at individuals and conducted by trainers and experienced experts (e.g. fishers) with trainees, with the purpose of building human capacity and disseminating good practices</li> <li>operations to improve the skills of different actors in the fisheries area (e.g. redirecting skills towards tourism or aquaculture)</li> <li>apprenticeship schemes</li> <li>scientists training fishers, e.g. to sample water quality</li> <li>Ensure that the operation is not more relevant to other types of operations, for example:</li> </ul>
		• 17 Capacity building
		60 Preparatory actions
15	Events	Operations related to organising and holding of
		events.
		Examples under direct management:
		decarbonisation
		spatial planning
		• sea-basin activities
		voluntary cooperation (UNCLOS)
		<ul><li>ocean partnerships</li><li>international agreements</li></ul>
		Events under shared management should be
		chosen if the main activity in the operation is the
		organisation and holding of one or more events.
		Examples include:
		• conferences
		<ul><li>trade shows</li></ul>
		• conventions
		• symposiums
		marketing events

Code	Description (type of operation)	Further definition
		other types of events offered to the general
		public
16	Awareness raising, communication to	Operations related to general awareness-raising
	the wider public	among the public (general public, schools, tourists
		etc.) on issues related to sustainability, the health
		benefits of fish consumption, and environmental
		protection, such as developing and conducting PR
		and communication campaigns.
		Examples include:
		• campaigns on sustainable fish consumption, marine litter and microplastics, nutrition
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		08 Preparation and implementation of
		production and marketing plans by producer
		organisations
		Marketing activities
		• 18 Development of marketing innovation
		<ul><li> 27 Environmental services</li><li> 60 Preparatory actions</li></ul>
17	Capacity building	Operations related to sector-level capacity
1 /	Capacity building	building, with the aim of strengthening the
		capacity of relevant sectors as a whole. Activities
		in TA are included.
		Examples include:
		development of training centres
		exposure visits
		<ul> <li>office and documentation support</li> </ul>
		development of learning centres
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		• 14 Training to improve skills and develop
		human capital
18	Development of marketing innovation	Operations related to the identification or
		application of new ideas that are useful in finding
		solutions to marketing issues.
		Examples include:
		identifying and developing new markets for species that currently have no or low market value
		<ul> <li>responding to the need to cater for new market</li> </ul>
		requirements such as organic sales or trademark registration
		Ensure that the operation is not more relevant to
		other types of operations, for example:
	1	

Code	Description (type of operation)	Further definition
		08 Preparation and implementation of
		production and marketing plans by producer
		organisations
		Marketing activities
		• 10 Advisory services
		Investments to support business development
		(strategy development, administration,
		<ul><li>equipment)</li><li>12 Other business-diversification operations not</li></ul>
		involving fisheries, aquaculture, or innovation
		• 20 Development of product innovation
		66 Other (economic)
19	Development of process innovation	Operations related to identifying or applying new
	_ conspicuos process since conse	ideas that are useful in improving business
		processes. Support changes or improvements in
		business processes through a series of linked tasks
		or activities to better help businesses reach their
		goals. These types of operations focus on <i>how</i>
		things are done.
		Examples include:
		<ul> <li>setting up or revamping systems of organisation</li> </ul>
		<ul> <li>setting up of revamping systems of organisation</li> <li>operational processes</li> </ul>
		<ul> <li>supporting processes</li> </ul>
20	Development of product innovation	Operations related to the identification or
	_ consequences produces cause cause	application of new ideas that are useful in finding
		solutions to product-related issues
		Examples include:
		developing and diversifying into new products
		• processing equipment
		adding value to products
		improvements in consumer convenience
		• packaging
		extending shelf life
		other quality improvements
21	Studies and research	Operations related to desk-based and/or field-
		based research into specific maritime and
		fisheries-related issues.
		Examples include:
		Studies in the framework of scientific advice
		Studies in the framework of voluntary
		contributions (fisheries)
		market intelligence
		healthy seas
		• decarbonisation
		• EMODnet (see type 21, below)
		literacy

Code	Description (type of operation)	Further definition
		socio-economic data
		projects and finance
		• IUU
22	Knowledge sharing	Operations related to investments aiming to
		increase data sharing and exchange of experience.
		Operations are those aimed at strengthening
		contacts between stakeholders and sharing
		knowledge, mainly through meetings or digital
		platforms.
		Operations related to the European marine
		observation and data network (EMODnet).
		Examples include:
		IT platforms to share data and information
		meetings, workshops, study visits etc. to share
		knowledge
		CLLD operations aiming explicitly at knowledge sharing
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		• 46 Data collection
23	Cooperation	Includes cooperation in direct management or
	1	CLLD operations with partners from different
		FLAG or LAG areas (from the same MS, different
		MS or non-EU countries)
24	Restoring ecological continuity of	Operations related to investments to preserve or
	rivers	restore rivers. This includes river restoration as
		well as investments in the continuity of the river
		to support biodiversity, recreation, flood
		management and landscape development.
		Examples include:
		dam removal
		• supporting fish migratory routes
		• fish ladders in riverine fisheries
		• fish ladders
		Ensure that the operation is not more relevant to other types of operations, for example:
		<ul> <li>38 Investments in Natura 2000 areas restoration</li> </ul>
		<ul> <li>38 investments in Natura 2000 areas restoration</li> <li>40 Investments in the restoration of marine</li> </ul>
		protected areas
25	Restocking of aquatic species	Operations related either to the restocking of
		endangered species, when explicitly listed as a
		conservation measure by a specific Union legal
		act, or to experimental restocking
26	Retrieval and/or disposal of marine	Operations related to the retrieval and proper
	litter	disposal of lost fishing gear and marine litter.
1		· ·

Code	Description (type of operation)	Further definition
	(.)[	Examples include:
		fishing for litter
		infrastructure improvements for collection and disposal of marine litter
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		• 10 Advisory services
27	Environmental services	Operations aiming to protect and enhance the marine and inland environment through fishing and cultivation techniques that support biodiversity, enhance the landscape, and improve the quality of water, air and soil.  Examples include:  • extensive farming • environmental contributions of farming, e.g. maintenance and development of ponds contributing to water management in the local area • farming systems with low impact on the environment, e.g. aquaponics (combined production of fish and vegetables or seaweed) • integrated farming (e.g. using animal waste as fertiliser for fish ponds) and organic aquaculture (e.g. use of sustainably sourced feed) • conservation of high-value habitats and their associated biodiversity (e.g. by reducing predator mortality through deterrent devices)  Ensure that the operation is not more relevant to other types of operations, for example:  • 32 Productive investments for sustainable aquaculture  • 34 Gear modification to minimise habitat impacts  • 36 Use of unwanted catches  • 37 Natura 2000 areas management and monitoring (soft operations)  • 38 Investments in Natura 2000 areas restoration  • 39 Management and monitoring of marine protected areas (soft operations)
		• 40 Investments in the restoration of marine protected areas
28	Specific investments for improving	Operations related to specific and punctual
	aquatic habitats and biodiversity	investments in marine and inland waters to
	_	improve and preserve habitats and biodiversity.
		Examples include:
		• investment in demarcating areas
	1	in recinion in demandaning areas

Code	Description (type of operation)	Further definition
Code	Description (type of operation)	<ul> <li>artificial reefs</li> <li>rebuilding fish banks</li> <li>river revitalisation</li> <li>Ensure that the operation is not more relevant to other types of operations, for example:</li> <li>36 Use of unwanted catches</li> <li>37 Natura 2000 areas management and monitoring (soft operations)</li> <li>38 Investments in Natura 2000 areas restoration</li> <li>39 Management and monitoring of marine protected areas (soft operations)</li> <li>40 Investments in the restoration of marine protected areas</li> </ul>
29	Permanent cessation of fishing activities	Operations related to permanent cessation achieved through the scrapping of a fishing vessel or through its decommissioning and retrofitting for activities other than commercial fishing, in line with the objectives of the CFP and multiannual plans. Specific conditions apply.
30	Temporary cessation of fishing activities	Operations related to temporary cessation of fishing activities. Temporary cessation applies in specific situations and under specific conditions (conservation).
31	Compensation	Operations related to compensation for additional costs in all regions eligible, including outermost regions, for fishery and aquaculture products.
32	Productive investments for sustainable aquaculture	Operations related to the production of sustainable aquaculture products and operations contributing to processing of aquaculture products. Such support shall contribute to the achievement of the objectives of the common organisation of the markets in aquaculture products.  Examples include:  • purchase of equipment  • modernisation to create more energy-efficient aquaculture  • improving quality of products  Ensure that the operation is not more relevant to other types of operations, for example:  • 01 Investment in reduction of energy use and energy efficiency
33	Gear selectivity to reduce unwanted catches	Operations related to the implementation of the Landing Obligation that serve to reduce unwanted catches through better targeting of species and sizes of fish.

Code	Description (type of operation)	Further definition
		Examples include:
		new gear to increase selectivity of catches by implementing new designs, new materials or escape panels
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		<ul> <li>14 Training to improve skills and develop human capital</li> <li>17 Capacity building</li> <li>21 Studies and research</li> </ul>
34	Gear modification to minimise habitat	Operations related to changes in fishing gear to
34	impacts	reduce negative impacts on the seabed and
	1	sensitive benthic habitats, i.e. physical
		characteristics of the sea bottom and its flora and fauna, as foreseen in Council Directive 92/43/EEC ("Habitats Directive").
		Examples include:
		gear that reduces physical interactions with the seabed and its flora and fauna
35	Gear selectivity in relation to	Operations related to the selection of gear aimed
	endangered, threatened and protected	at reducing unwanted catches of endangered
	species	threatened and protected (ETP) species such as birds and mammals.
		Examples include:
		<ul> <li>new gear designs to reduce ETP interactions</li> <li>shape of fishing hooks</li> <li>noise devices on gear</li> </ul>
36	Use of unwanted catches	Operations related to addressing or alleviating
		consequences of the Landing Obligation.
		Unwanted catches must not be destined for human
		consumption.
		Examples include:
		storage on board
		reception facilities in port
		<ul> <li>production and marketing of products based on unwanted catches</li> </ul>
37	Natura 2000 areas management and	Operations related to management and monitoring
	monitoring (soft operations)	in accordance with the prioritised action
		frameworks established pursuant to the
		requirements under the Birds 2009/147/EC or
		Habitats 92/43/EEC directives' "soft" operations,
		related specifically to Natura 2000 areas.  Note that demarcation of areas and soft
		management actions may also contribute to
		natural restoration and regeneration of degraded
		natural restoration and regeneration of degraded

Code	Description (type of operation)	Further definition
		areas.
		Examples include:
		<ul> <li>actions related to the establishment of Natura 2000 sites (for example scientific studies/inventories for the identification of sites – surveys, inventories, mapping, condition assessment, workshops and meetings, creation of databases, establishment and operation of management structures and bodies etc.).</li> <li>preparation of management plans, strategies and schemes (including scientific studies and investigations needed for planning and implementation, consultations, public meetings and liaison with landowners)</li> <li>pilot projects;</li> <li>conservation management measures design and implementation;</li> <li>preparation of information and publicity material, awareness campaigns and surveys</li> <li>monitoring and surveying, site surveillance.</li> <li>Ensure that the operation is not more relevant to other types of operations, for example:</li> <li>03 Investment in on-board production equipment</li> <li>05 Investment in physical infrastructure at existing fishing ports or at new or existing landing sites</li> <li>14 Training to improve skills and develop human capital</li> <li>17 Capacity building</li> <li>33 Gear selectivity to reduce unwanted catches</li> <li>34 Gear modification to minimise habitat impacts</li> </ul>
		• 35 Gear selectivity in relation to endangered, threatened and protected species
		<ul> <li>38 Investments in Natura 2000 areas restoration</li> </ul>
38	Investments in Natura 2000 areas	Operations related to investments in the
	restoration	restoration of Natura 2000 areas, in accordance
		with the prioritised action frameworks established
		pursuant to the requirements under the Birds
		2009/147/EC or Habitats 92/43/EEC directives.
		Examples include:
		<ul> <li>infrastructure needed for habitat or species protection, restoration and conservation including equipment acquisition</li> </ul>
		specific infrastructure for the monitoring and management of the environmental issues for example water management

Code	Description (type of operation)	Further definition
		<ul> <li>infrastructure for public access, interpretation, observatories and kiosks, etc. (for example infrastructure to increase the amenity value of sites such as signage, trails, observation platforms and visitor centres).</li> <li>investments related to green infrastructure measures.</li> <li>Ensure that the operation is not more relevant to other types of operations, for example:</li> <li>37 Natura 2000 areas management and monitoring (soft operations)</li> </ul>
39	Management and monitoring of marine protected areas (soft operations)	Operations related to management and monitoring of MPAs, i.e. protected areas other than Natura 2000 pursuant to the MSFD 2008/56/EC, and "soft" operations related specifically to MPAs.  Examples include:  • actions related to the establishment of MPAs (for example scientific studies/inventories for the identification of sites – surveys, inventories, mapping, condition assessment, workshops and meetings, creation of databases, establishment and operation of management structures and bodies etc.)  • preparation of management plans, strategies and schemes (including scientific studies and investigations needed for planning and implementation, consultations, public meetings and liaison with landowners)  • pilot projects  • conservation management measures design and implementation;  • preparation of information and publicity material, awareness campaigns and surveys  • monitoring and surveying, site surveillance Ensure that the operation is not more relevant to other types of operations, for example:  • 40 Investments in the restoration of marine protected areas
40	Investments in the restoration of marine protected areas	Operations related to the restoration of MPAs, i.e. protected areas other than Natura 2000 pursuant to the MSFD 2008/56/EC. Examples include:  • infrastructure needed for habitat or species protection, restoration and conservation including equipment acquisition  • specific infrastructure for the monitoring and management of the environmental issues for example discharges and litter

Code	Description (type of operation)	Further definition
		• infrastructure for public access, interpretation,
		observatories and kiosks, etc.
		investments related to green infrastructure
4.4		measures.
41	Reduction and prevention of	Operations related to reducing or preventing
	pollution/contamination	pollution from fisheries and aquaculture.
		Examples include:
		eco-friendly anti-fouling paints
		reduction of discharges from vessels,
		aquaculture operations and processing plants
		Ensure that the operation is not more relevant to other types of operations, for example:
		<ul> <li>14 Training to improve skills and develop</li> </ul>
		human capital
		16 Awareness raising, communication to the
		wider public
		17 Capacity building
		21 Studies and research
		26 Retrieval and/or disposal of marine litter
42	Water usage and water quality	Operations related to the efficient use of water,
	improvements	particularly in land-based activities like
		aquaculture and processing plants.
		Examples include:
		technologies to reduce water use
		installation of water purification systems
		• recirculation systems
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		<ul><li>10 Advisory services</li><li>14 Training to improve skills and develop</li></ul>
		human capital
		17 Capacity building
		21 Studies and research
43	Investments for control and	Operations related to "hard" investments in
	enforcement for public authorities	equipment and facilities, or "softer" operations,
		supporting activities of the fisheries control
		agencies.
		Examples include:
		equipment for control agencies
		• IT solutions
		IT processes for the management and recording
		of control-related data
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		• 51 Inspections
		• 23 Cooperation

Code	Description (type of operation)	Further definition
44	Investments for control and	Operations related to investments in equipment
	enforcement for private business	used by private businesses for control and
	_	enforcement.
		Examples include:
		CCTV cameras
		• installation of VMS/AIS/ERS, REM
		devices for electronic reporting of catch by small-scale fishers
		devices for continuous measurement and recording of engine power
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		• 10 Advisory services
		14 Training to improve skills and develop
		human capital
		<ul><li>17 Capacity building</li><li>21 Studies and research</li></ul>
45	Observation coordination	Operations related to the data collection
43	Observation coordination	framework in direct management.
		Examples include:
		scientific advice
		EMODnet
		<ul> <li>voluntary contributions (governance)</li> </ul>
		ocean research and data
		regional coordination of sampling through Data Collection Framework
46	Data collection	Operations related to MS' actions to collect and
		process data (in line with the Data Collection
		Framework Regulation (EU) No 2017/1004,), to
		contribute to the best available scientific advice
		and to provide information important for studies
		and evaluations, which serves to increase
		knowledge of the state of the marine environment.
47	Investment in IT – hardware	Operations related to investments in any kind of
		hardware used for governance of the seas and
		oceans (including MSP) and collection and
		processing of data for fisheries management and
		scientific purposes.
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		• 43 Investments for control and enforcement for public authorities
		• 48 Investment in IT – software
48	Investment in IT – software	Operations related to investment in any kind of
		software related to governance of the seas and

Code	Description (type of operation)	Further definition
	(c) process and control of the contr	oceans (including MSP) and collection and
		processing of data for fisheries management and
		scientific purposes.
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		• 43 Investments for control and enforcement for
		public authorities
		• 47 Investment in IT – hardware
49	IT development and maintenance	Operations related to investment in IT,
		development and maintenance as a joint operation
		mainly under direct management.
		Examples include:
		• enforcement
		• IUU
50	Data assembly and dissemination	Operations related to data assembly and
		dissemination mainly under direct management.
		Examples include:
		<ul> <li>data assembly and processing</li> </ul>
		<ul> <li>maritime security</li> </ul>
		<ul> <li>data aggregation and dissemination. e.g.</li> </ul>
		EMODnet, Blue indicators
		ocean research and data
		EUMOFA market observatory under direct
		management
		any future observatory on blue economy und
~.		direct management
51	Inspections	Operations related to inspection under direct
		management. Examples include:
		• enforcement
50	T 10	COM inspection missions
52	Investment in animal welfare	Operations related to animal health and welfare in
		aquaculture in accordance with Regulations (EU)
		No 2016/429 and (EU) No 652/2014.
		Examples include:
		disease prevention
		management of stocking densities
		• slaughtering techniques
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		• 10 Advisory services
		• 14 Training to improve skills and develop
		human capital
		<ul><li>17 Capacity building</li><li>21 Studies and research</li></ul>
53	Food quality and hygians safety	
SS	Food quality and hygiene safety	Operations related to food safety to protect

Code	Description (type of operation)	Further definition
		consumers, reduce food waste and increase EU
		food security.
		Examples include:
		hygiene promotion
		quality certification
		quality promotion
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		• 10 Advisory services
		• 14 Training to improve skills and develop
		human capital
		<ul><li>17 Capacity building</li><li>21 Studies and research</li></ul>
54	Investments in safety equipment	Operations related to improvements in health,
34	investments in safety equipment	safety and working conditions.
		Examples include:
		<ul> <li>on board health/safety improvements for crews</li> </ul>
		such as on-board fire prevention systems, safety
		and alarm systems or noise reductions systems
		health/safety improvements in ports
		health/safety improvements in processing and
		aquaculture operations
		In case the operation leads to an increase of GT
		according to EMFAF Article 19 (3), the GT
		increase needs to be reported in field 27 of
		Infosys.
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		• 14 Training to improve skills and develop
		human capital
		• 17 Capacity building
55	Investments in working conditions	<ul> <li>55 Investments in working conditions</li> <li>Operations related to improvements in health,</li> </ul>
33	Investments in working conditions	safety and working conditions.
		Examples include:
		on board working condition improvement such as accommodation facilities dedicated to the
		exclusive use of the crew, including sanitary
		facilities, common areas, kitchen facilities and
		shelter deck structures
		improvements in ports
		improvements in processing and aquaculture
		operations
		In case the operation leads to an increase of GT
		according to EMFAF Article 19 (3), the GT
		increase needs to be reported in field 27 of

Code	Description (type of operation)	Further definition
		Infosys.
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		• 14 Training to improve skills and develop
		human capital
		17 Capacity building
		• 54 Investments in safety equipment
56	Pilot projects	Operations related to an initial, often small-scale,
		implementation that is used to prove the viability,
		applicability and risks of an idea, concept or
		technique. Pilot projects can relate to a broad
		range of activities including CLLD.
		Examples include:
		assessment of new gear
		• specifications of processing machines
		testing compositions of feeds in aquaculture
		new diversification activities
57	Socio-cultural development	Operations related to promoting and/or
		capitalising on the social and cultural heritage of
		the area or improving the quality of life of the
		local community. Investments that strengthen and
		capitalise on the environmental resources, cultural
		resources and social resources of the region.
		Projects can be related to CLLD.
		Examples include:
		investments in revitalisation of old crafts
		<ul><li>museums</li><li>markets</li></ul>
		• trails
		<ul> <li>support for clubs and societies</li> </ul>
		<ul> <li>socio-cultural development</li> </ul>
58	Governance	Operations related to improving ocean and coastal
		governance, within the EU as well as at global
		level. Investments that strengthen and capitalise
		on the environmental resources, cultural resources
		and social resources of the region or area.
		Examples under shared management include:
		CLLD actions to involve small-scale coastal
		fisheries in relevant decision-making structures
		CLLD actions to improve the management of
		local resources
		Examples under direct management include:
		advisory councils
		• voluntary contributions (fisheries)
		healthy seas

Code	Description (type of operation)	Further definition
		maritime security
		<ul> <li>voluntary contributions (governance)</li> </ul>
		<ul> <li>support to organisations such as coastguards or RFMOs</li> </ul>
		regional coordination such as the Atlantic assistance mechanism
59	Animation and capacity building	Operations related to participative implementation
	7 miniation and capacity building	of FLAG local development strategies, including
		staff costs and operations supporting community
		animation, project development, and awareness-
		raising activities in FLAG areas.
		Examples include:
		information campaigns
		<ul> <li>strengthening community organisations</li> </ul>
		<ul> <li>promoting and supporting the preparation of projects and applications, post-start-up project support</li> </ul>
		• training courses, seminars, workshops etc.
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		14 Training to improve skills and develop human capital
		17 Capacity building
60	Preparatory actions	Operations related to participative design of
		FLAG local development strategies.
		Examples include:
		studies of the area concerned
		costs related to creating a local development
		strategy, including consultancy and meetings with stakeholders, community groups and
		potential project promoters
		administrative costs (operating and personnel
		costs) of the organisation that is applying for preparatory support, during the preparatory
		phase
		<ul> <li>capacity building for local development</li> </ul>
		strategy development
		support for small pilot projects
		• information campaigns: events, meetings,
		leaflets, websites, social media, press etc
61	Management	Operations related to the running costs and
		animation of FLAGs in terms of staff and
		operational expenses, including activities related
		to monitoring and evaluation of the FLAGs, and
		strategy implementation if not separate from the
		FLAG operation. TA activities.

Code	Description (type of operation)	Further definition
		Examples include:
		<ul> <li>office expenses and staff costs</li> <li>technical assistance</li> <li>fisheries management</li> <li>monitoring and evaluation of the FLAGs and strategy implementation (if not separate from the FLAG operation).</li> </ul>
		Ensure that the operation is not more relevant to
		other types of operations, for example:
		<ul><li>59 Animation and capacity building</li><li>60 Preparatory actions</li><li>63 Evaluation</li></ul>
62	Assistance under direct management	Operations supporting the implementation of EU policy, for example the Maritime Spatial Planning Platform, or assistance in direct management.
63	Evaluation	Operations related to the evaluation of EMFAF under direct and shared management. Activities in TA are included.  Examples include:  • process evaluation  • impact evaluation  • thematic assessments/studies  • ex-ante evaluation  • interim evaluation  • acypost evaluation  • support for COM evaluations  • monitoring and evaluation of the FLAGs and strategy implementation (if standalone)
64	Other (social)	Other operations contributing to improving human capital. This may include CLLD operations.
65	Other (environmental)	Other operations contributing to reducing the impact of fishing on marine ecosystems. This may include CLLD operations.
66	Other (economic)	Other operations contributing to business development. This may include CLLD operations.

Table 8: Form of support (Annex I, Table 1, field 35)

Code	Description
01	Grants
02	Financial instruments
03	Combination of grants and financial instruments
04	Prizes
05	Contracting (Direct management)

Table 10: Common result indicators (Annex I. Table 2, field 37)

For more detailed information see Annex 3.3.2 Common Result Indicators, fiches

Code	Description	Measurement unit
CR01	New production capacity	tonnes/annum
CR02	Aquaculture production maintained	tonnes/annum
CR03	Businesses created	number of entities
CR04	Businesses with higher turnover	number of entities
CR05.1	Capacity of vessels withdrawn	GT
CR05.2	Capacity of vessels withdrawn	kW
CR06	Jobs created	number of persons
CR07	Jobs maintained	number of persons
CR08	Persons benefitting	number of persons
CR09.1	Area addressed by operations contributing to a good environmental status, protecting, conserving, and restoring biodiversity and ecosystems	km2
CR09.2	Area addressed by operations contributing to a good environmental status, protecting, conserving, and restoring biodiversity and ecosystems	km
CR10	Actions contributing to a good environmental status, including nature restoration, conservation, protection of ecosystems, biodiversity, animal health and welfare	number of actions
CR11	Entities increasing social sustainability	number of entities
CR12	Effectiveness of the system for "collection, management and use of data"	scale: high, medium, low
CR13	Cooperation activities between stakeholders	number of actions
CR14	Innovations enabled	number of new products, services, processes,

		business models or
		methods
CR15	Control means installed or improved	number of means
CR16	Entities benefitting from promotion and information activities	number of entities
CR17	Entities improving resource efficiency in production and/or processing	number of entities
CR18.1	Energy consumption leading to CO2 emissions reduction	kWh/tonnes
CR18.2	Energy consumption leading to CO2 emissions reduction	litres/h
CR19	Actions to improve governance capacity	number of actions
CR20	Investment induced	EUR
CR21	Datasets and advice made available	number
CR22	Usage of data and information platforms	number of page views

## 3.5 Technical specifications of aggregation rules for Article 42 reporting, CPR annex VII, tables 1, 4, 5, 9

Column number	Title	Corresponding Infosys field or other sources of data	Comments/rules
1.	Priority	Field 06	Derived from the specific objective in field 06, no priority field in Infosys
2.	Specific objective	Field 06	-
3.	Fund	-	Always EMFAF
4.	Category of region	n.a.	-
5.	Basis for the calculation of Union contribution (Total contribution or public contribution)	OP	Public contribution
6.	Total financial allocation by fund and national contribution (EUR)	OP	Equals column number 5
7.	Co-financing rate (%)	OP	-
8.	Total eligible cost of selected operations (EUR)	Field 18	SUM of Infosys field 18
9.	Contribution from the funds to selected operations (EUR)	Field 19	SUM of Infosys field 19
10.	Proportion of the total financial allocation covered with selected operations (%) [column 8/ column 6x 100]	Infosys field 18; OP	SUM of Infosys field 18 divided by column number 6 times 100
11.	Total eligible expenditure declared by beneficiaries	Field 22	SUM of Infosys field 22
12.	Proportion of the total financial allocation covered	Field 22; OP	SUM of Infosys field 22, divided by column number 6 times 100

	by eligible expenditure		
	declared by beneficiaries (%)		
	[column 11/column 6x100]		
13.	Number of selected	Field 02; field 16	COUNT of field 02, for all operations where field 16 = 00, 02, 03,
	operations		04

Table 4: Breakdown of the cumulative financial data by type of intervention for the EMFAF (point (a) of Article 42(2))
