# Evaluation activities for EMFAF in Croatia

*FAMENET Online Channel, 28 September 2023*

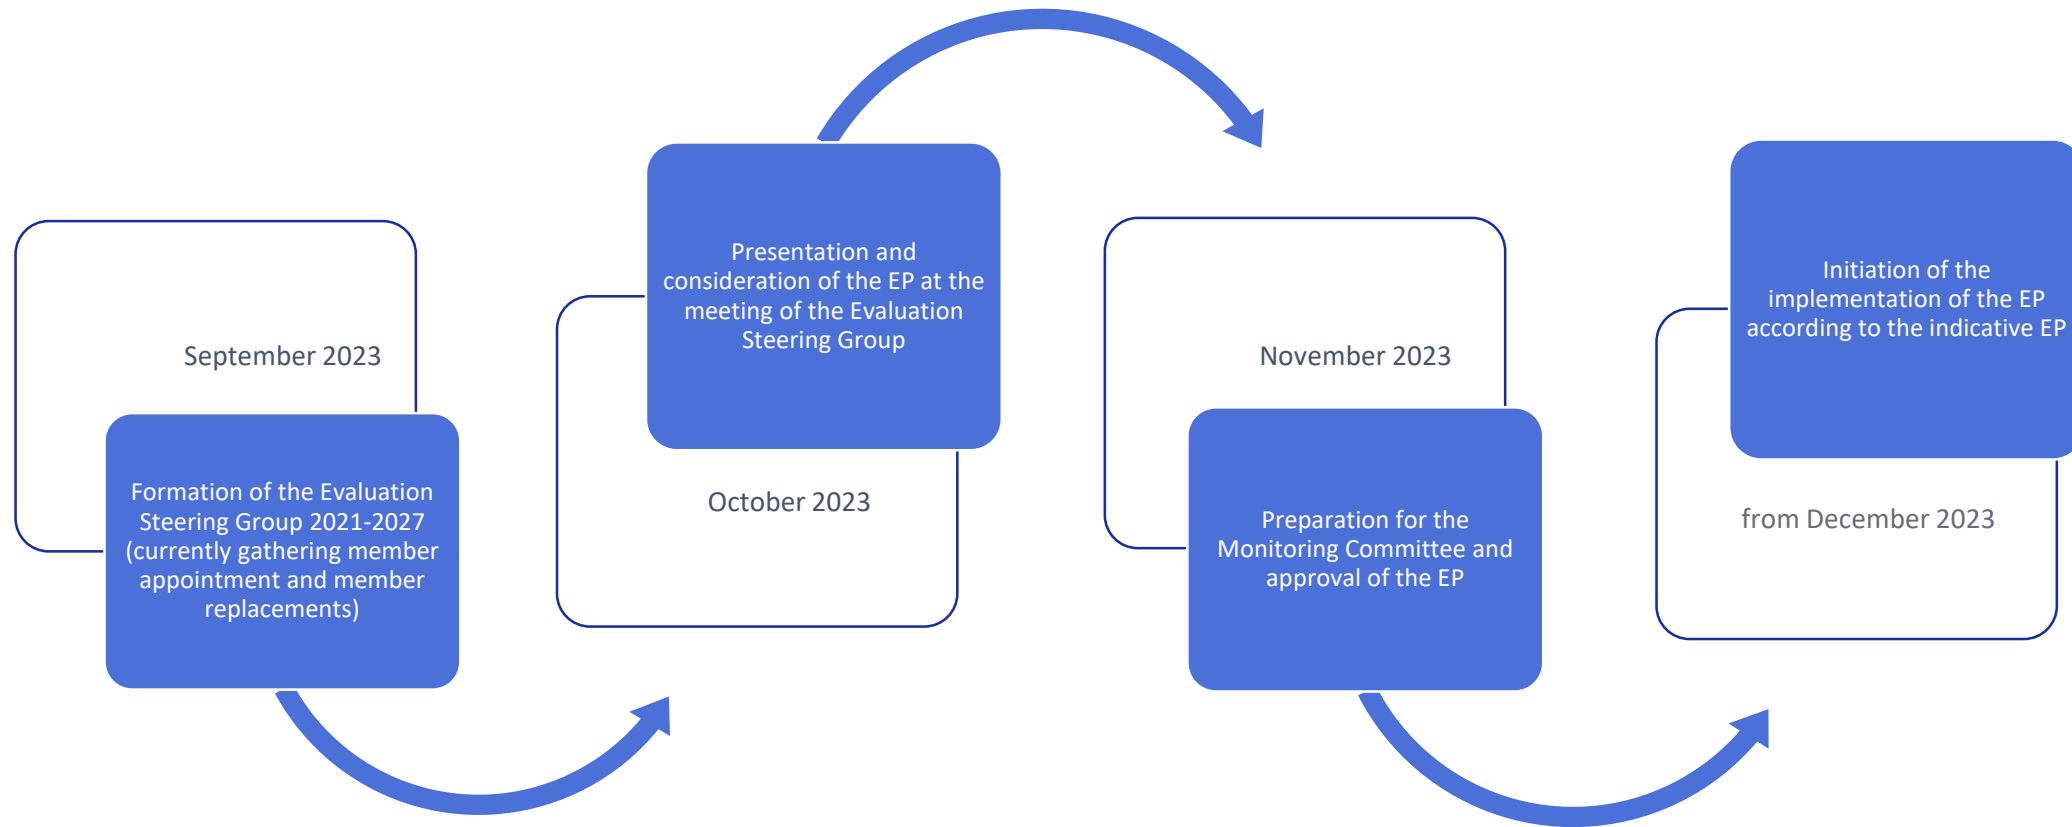

# Lessons learned through the development of the EP

- During the creation of the EP, the MA took into account the experience of drafting and implementing the EP for EMFF 2014-2020 and the FAMENET guidelines for creating the EP.
- The experience served as a foundation for the EP in terms of the time frame, budget, formulation of evaluation questions, etc.
- Communication and meetings with Inter – Institutional Evaluation Working group (IEWG) and exchanging experiences with other bodies have assisted in the drafting coordination process.

# Upcoming planned evaluation activities

# Challenges foreseen with evaluations

Number of evaluations and the time frame for their implementation

The timing of evaluations should be coordinated with the execution of operations both during the contracting period and the payment period

Croatia has a small market, and the number of external evaluators is limited, thereby constraining the simultaneous execution of evaluations

Bring all evaluations to a successful conclusion
